Ethnicity and Class Conflict in Rural Mexico Frans J. Schryer, 2014-07-14 In this case study of a recent peasant uprising in an ethnically diverse region of Mexico Frans Schryer addresses an important issue in the cultural history of Latin America what is the relationship of class to ethnicity and how do these two elements of cultural perception and social hierarchy reinforce or contradict each other Examining the interaction between commercial cattle raisers and subsistence agricultural workers in both Nahua and Mestizo villages Schryer focuses on how ethnic identities and administrative structures affect the form and outcome of agrarian struggles He shows that class culture and social organization are interconnected but vary independently and demonstrates that communal land tenure and corporate structures are compatible with class differentiation and even overt class conflict within peasant communities Schryer's data is based on archival research direct observation and extensive interviews with key actors involved in the conflict His book traces the origins of local variations in legal status and ethnic relations back to the development of Indian republics haciendas and ranchos By considering competing interpretations of more recent history especially the CNB's era the author also provides insights into the mentality of protagonists involved in both ideological confrontations and armed encounters What emerges is a detailed comprehensive study that places as much emphasis on culture and discourse as on economic structures and political forces Originally published in 1990 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

The Möbius Strip Jonathan D. Amith, 2005-10-10 The Möbius Strip explores the history political economy and culture of space in central Guerrero Mexico during the colonial period This study is significant for two reasons First space comprises a sphere of contention that affects all levels of society from the individual and his or her household to the nation state and its mechanisms for control and coercion Second colonialism offers a particularly unique situation for it invariably involves a determined effort on the part of an invading society to redefine politico administrative units to redirect the flow of commodities and cash and ultimately to foster and construct new patterns of allegiance and identity to communities regions and country Thus spatial politics comprehends the complex interaction of institutional domination and individual agency The complexity of the diachronic transformation of space in central Guerrero is illustrated through an analysis of land tenure migration and commercial exchange three salient and contested aspects of hispanic conquest The Möbius Strip therefore addresses issues important to social theory and to the understanding of the processes affecting the colonialization of non Western societies
