Alimi,Ghita Mezzour,Nizar Rokbani,Azah Kamilah Muda,2017-02-21 This book presents the latest research in hybrid intelligent systems It includes 57 carefully selected papers from the 16th International Conference on Hybrid Intelligent Systems HIS 2016 and the 8th World Congress on Nature and Biologically Inspired Computing NaBIC 2016 held on November 21 23 2016 in Marrakech Morocco HIS NaBIC 2016 was jointly organized by the Machine Intelligence Research Labs MIR Labs USA Hassan 1st University Settat Morocco and University of Sfax Tunisia Hybridization of intelligent systems is a promising research field in modern artificial computational intelligence and is concerned with the development of the next generation of intelligent systems The conference s main aim is to inspire further exploration of the intriguing potential of hybrid intelligent systems and bio inspired computing As such the book is a valuable resource for practicing engineers scientists and researchers working in the field of computational intelligence and artificial intelligence **Survey of the State of the Art in Human Language Technology** Giovanni Battista Varile,Antonio Zampolli,1997 Originally published in 1997 this book is concerned with human language technology This technology provides computers with the capability to handle spoken and written language One major goal is to improve communication between humans and machines If people can use their own language to access information working with software applications and controlling machinery the greatest obstacle for the acceptance of new information technology is overcome Another important goal is to facilitate communication among people Machines can help to translate texts or spoken input from one human language to the other Programs that assist people in writing by checking orthography grammar and style are constantly improving This book was sponsored by the Directorate General XIII of the European Union and the Information Science and Engineering Directorate of the National Science Foundation USA Technology Diffusion and Adoption: Global Complexity, Global Innovation Zolait, Ali Hussein Saleh,2013-01-31 Technology Diffusion and Adoption Global Complexity Global

Innovation discusses the emerging topics of information technology and the IT based solutions in global and multi cultural environments This comprehensive collection addresses the aspects of innovation diffusion in the field of business computing technologies and is essential for researchers practitioners academicians and educators all over the world **Advances In Digital Handwritten Signature Processing: A Human Artefact For E-society** Giuseppe Pirlo,Donato Impedovo,Michael Fairhurst,2014-05-30 In the age of e society handwritten signature processing is an enabling technology in a multitude of fields in the digital agenda of many countries ranging from e health to e commerce from e government to e justice from e democracy to e banking and smart cities Handwritten signatures are very complex signs they are the result of an elaborate process that depends on the psychophysical state of the signer and the conditions under which the signature apposition process occurs Notwithstanding recent efforts from academies and industries now make possible the integration of signature based technologies into other standard equipment to form complete solutions that are able to support the security requirements of today s society Advances in Digital Handwritten Signature Processing primarily provides an update on the most fascinating and valuable researches in the multifaceted field of handwritten signature analysis and processing The chapters within also introduce and discuss critical aspects and precious opportunities related to the use of this technology as well as highlight fundamental theoretical and applicative aspects of the field This book contains papers by well recognized and active researchers and scientists as well as by engineers and commercial managers working for large international companies in the field of signature based systems for a wide range of applications and for the development of e society This publication is devoted to both researchers and experts active in the field of biometrics and handwriting forensics as well as professionals involved in the development of signature based solutions for advanced applications in medicine finance commerce banking public and private administrations etc Handwritten Signature Processing may also be used as an advanced textbook by graduate students *Text Entry Systems* I. Scott MacKenzie,Kumiko Tanaka-Ishii,2010-07-28 Text Entry Systems covers different aspects of text entry systems and offers prospective researchers and developers global guidelines for conducting research on text entry in terms of design strategy evaluation methodology and requirements a discussion of the history and current state of the art of entry systems and specific guidelines for designing entry systems for a specific target depending on devices modalities language and different physical conditions of users Text entry has never been so important as it is today This is in large part due to the phenomenal relatively recent success of mobile computing text messaging on mobile phones and the proliferation of small devices like the Blackberry and Palm Pilot Compared with the recent past when text entry was primarily through the standard qwerty keyboard people today use a diverse array of devices with the number and variety of such devices ever increasing The variety is not just in the devices but also in the technologies used entry modalities have become more varied and include speech recognition and synthesis handwriting recognition and even eye tracking using image processing on web cams Statistical language modeling has advanced greatly in the past ten

years and so therein is potential to facilitate and improve text entry increasingly the way people communicate This book covers different aspects of text entry systems and offers prospective researchers and developers Global guidelines for conducting research on text entry in terms of design strategy evaluation methodology and requirements History and current state of the art of entry systems including coverage of recent research topics Specific guidelines for designing entry systems for a specific target depending on devices modalities language and different physical conditions of users

Research Anthology on Bilingual and Multilingual Education Management Association, Information Resources,2021-10-29 Given the boost in global immigration and migration as well as the emphasis on creating inclusive classrooms research is turning to the challenges that teachers face with the increasing need for bilingual and multilingual education The benefits of bilingual education are widespread allowing students to develop important cognitive skills such as critical thinking and problem solving as well as opening further career opportunities later in life However very few resources are available for the successful practice and implementation of this education into the curriculum with an even greater lack of appropriate cultural representation in the classroom Thus it is essential for educators to remain knowledgeable on the emerging strategies and procedures available for making bilingual and multilingual education successful The Research Anthology on Bilingual and Multilingual Education is a comprehensive reference source on bilingual and multilingual education that offers the latest insights on education strategy and considerations on the language learners themselves This

research anthology features a diverse collection of authors offering valuable global perspectives on multilingual education. Covering topics such as gamification, learning processes and teaching models, this anthology serves as an essential resource for professors, teachers, pre-service teachers, faculty of K-12 and higher education, government officials, policymakers, researchers and academicians with an interest in key strategy and understanding of bilingual and multilingual education.

Software Engineering, Artificial Intelligence, Networking and Parallel/Distributed Computing 2011 Roger Lee, 2011-06-12. The purpose of the 12th Conference Software Engineering Artificial Intelligence Networking and Parallel Distributed Computing SNPD 2011 held on July 6-8, 2011 in Sydney, Australia, was to bring together scientists, engineers, computer users and students to share their experiences and exchange new ideas and research results about all aspects: theory, applications and tools of computer and information sciences and to discuss the practical challenges encountered along the way and the solutions adopted to solve them. The conference organizers selected 14 outstanding papers from SNPD 2011, all of which you will find in this volume of Springer's Studies in Computational Intelligence.

Dense Image Correspondences for Computer Vision Tal Hassner, Ce Liu, 2015-11-21. This book describes the fundamental building block of many new computer vision systems: dense and robust correspondence estimation. Dense correspondence estimation techniques are now successfully being used to solve a wide range of computer vision problems very different from the traditional applications. Such techniques were originally developed to solve This book introduces the techniques used for establishing correspondences between challenging image pairs, the novel features used to make these techniques robust and the many problems dense correspondences are now being used to solve. The book provides information to anyone attempting to utilize dense correspondences in order to solve new or existing computer vision problems. The editors describe how to solve many computer vision problems by using dense correspondence estimation. Finally, it surveys resources, code and data necessary for expediting the development of effective correspondence-based computer vision systems.

Multimodal Interactive Handwritten Text Transcription Veronica Romero, Alejandro Hector Toselli, Enrique Vidal, 2012-05-21. This book presents an interactive multimodal approach for efficient transcription of handwritten text images. This approach, rather than full automation, assists the expert in the recognition and transcription process. Until now, handwritten text recognition (HTR) systems are far from being perfect and heavy human intervention is often required to check and correct the results of such systems. The interactive scenario studied in this book combines the efficiency of automatic handwriting recognition systems with the accuracy of the experts, leading to a cost-effective, perfect transcription of the handwritten text images. The interactive system here allows the user to repeatedly interact with the

system Hence the quality and ergonomics of the interactive process is crucial for the success of the system Moreover more ergonomic multimodal interfaces are used to obtain an easier and more comfortable human machine interaction
