Frustrated Young Men:

True Nature Michael R. Kauth, 2012-12-06 I have long been awe struck by authors claims that their books had been in the making for 5 or 10 or even 15 years I now have a better appreciation of the work involved in bringing a book to press The seeds of this project have had a long germination The impetus for this book began more than 10 years ago when I was a graduate student in clinical psychology Having an interest in human sexuality and in theories on the forms of sexual attraction specifically I was perplexed by various perspectives on this subject Disciplines of thought that I encountered medicine evolutionary biology developmental psychology gay lesbian theory social constructionism anthropology Marxism Christianity and others perceived the issue so differently so strongly with almost no overlap I was fascinated that the question of how and why one is attracted to either one or both sexes could elicit such conviction and divergent points of view There seemed to be no easy way to resolve these differences Still what frustrated me most in my readings were several conceptual problems among the two prominent proponents of contemporary sexuality theory scientists and social constructionists One of my first frustrations with biomedical and social scientists who write about sexuality was that they often define sexual attraction in strict behavioral terms as completed observable sexual acts observable in the sense that such acts or their consequences are seen by others

Orgasm and the West Robert Muchembled, 2008-12-03 Can the orgasm be explained in historical terms Robert Muchembled's book unearths fascinating sources which suggest that we need to look with a fresh eye at the past and realize that the sublimation of the erotic impulse was far more than simple religious ascetism it was the hidden driving force of the West until the 1960s

Warlike and Peaceful Societies Agner Fog, 2017-10-13 Are humans violent or peaceful by nature We are both In this ambitious and wide ranging book Agner Fog presents a ground breaking new argument that explains the existence of differently organised societies using evolutionary theory It combines natural sciences and social sciences in a

way that is rarely seen According to a concept called regality theory people show a preference for authoritarianism and strong leadership in times of war or collective danger but desire egalitarian political systems in times of peace and safety These individual impulses shape the way societies develop and organise themselves and in this book Agner argues that there is an evolutionary mechanism behind this flexible psychology Incorporating a wide range of ideas including evolutionary theory game theory and ecological theory Agner analyses the conditions that make us either strident or docile He tests this theory on data from contemporary and ancient societies and provides a detailed explanation of the applications of regality theory to issues of war and peace the rise and fall of empires the mass media economic instability ecological crisis and much more Warlike and Peaceful Societies The Interaction of Genes and Culture draws on many different fields of both the social sciences and the natural sciences It will be of interest to academics and students in these fields including anthropology political science history conflict and peace research social psychology and more as well as the natural sciences including human biology human evolution and ecology

A Hunter-Gatherer's Guide to the 21st Century Heather Heying, Bret Weinstein, 2021-09-14 A provocative exploration of the tension between our evolutionary history and our modern woes and what we can do about it We are living through the most prosperous age in all of human history yet we are listless divided and miserable Wealth and comfort are unparalleled but our political landscape is unmoored and rates of suicide loneliness and chronic illness continue to skyrocket How do we explain the gap between these truths And how should we respond For evolutionary biologists Heather Heying and Bret Weinstein the cause of our troubles is clear the accelerating rate of change in the modern world has outstripped the capacity of our brains and bodies to adapt We evolved to live in clans but today many people don't even know their neighbors names In our haste to discard outdated gender roles we increasingly deny the flesh and blood realities of sex and its ancient roots The cognitive dissonance spawned by trying to live in a society we are not built for is killing us In this book Heying and Weinstein draw on decades of their work teaching in college classrooms and exploring Earth's most biodiverse ecosystems to confront today's pressing social ills from widespread sleep deprivation and dangerous diets to damaging parenting styles and backward education practices Asking the questions many modern people are afraid to ask A Hunter-Gatherer's Guide to the 21st Century outlines a science-based worldview that will empower you to live a better wiser life

An Uncertain Age Paul Ocozbek, 2017-03-27 In twentieth century Kenya age and gender were powerful cultural and political forces that animated household and generational relationships They also shaped East Africans contact with and influence on emergent colonial and global ideas about age and masculinity Kenyan men and boys came of age achieving their manhood through changing rites of passage and access to new outlets such as town life crime anticolonial violence and nationalism And as they did the colonial government appropriated masculinity and maturity as means of statecraft and control In An Uncertain Age Paul Ocozbek positions age and gender at the heart of everyday life and state building in Kenya He excavates in unprecedented ways how the evolving concept of youth motivated and energized colonial

power and the movements against it exploring the masculinities boys and young men debated and performed as they crisscrossed the colony in search of wages or took the Mau Mau oath Yet he also considers how British officials own ideas about masculinity shaped not only young African men s ideas about manhood but the very nature of colonial rule An Uncertain Age joins a growing number of histories that have begun to break down monolithic male identities to push the historiographies of Kenya and empire into new territory

seeks to illuminate the place of noblewomen in early modern aristocratic culture both as historical subjects considering personal circumstances and as a social group considering social position and status. She argues that two different gender ideals were in operation simultaneously: one primarily religious ideal which lauded female silence, obedience, and chastity, and another more secular ideal which required noblewomen to be beautiful, witty, brave, and receptive to the games of courtly love.

From Hamas to America Mosab Hassan Yousef, James Becket, 2024-08-06. *From Hamas to America* is a gripping memoir that follows the son of Hamas founder Mosab Hassan as he breaks away from his culture's practice of terrorism to becoming a double agent for Israel, finally fleeing to America and becoming a US citizen and ultimately finding peace. This is my opportunity to share my journey with others, to let go of both the traumas and the triumphs, to find freedom to proclaim my truth. Mosab Hassan Yousef has worn many labels: Hamas terrorist, Green Prince, spy, traitor, hero, Hollywood player, Muslim, Christian, yogi, stateless, refugee, deportee, citizen. But all these labels have one thing in common: they serve someone else's agenda. Now, for the first time, the New York Times bestselling author of *Son of Hamas* tells the full truth of his story. In it, we see him growing up as the son of one of the founders of Hamas, being imprisoned and tortured by the Israelis, growing to hate the Hamas tactics of rape and violence, working with the Israeli intelligence to expose suicide bombers and save lives, seeking asylum in the US, fighting with Homeland Security to avoid deportation, rejecting Islam and converting to Christianity, and making international headlines for it, becoming a top speaker on Middle Eastern affairs and the Israeli-Palestinian conflict, working with Hollywood to tell his story and obtaining US citizenship, and discovering the life-saving discipline of yoga. This is the inspiring story of someone who has been under threat of assassination or imprisonment for most of his life but who somehow finds the path to freedom and peace. Few will walk in his shoes, but everyone can follow his example and make their own journey to find redemption and peace.

Men Who Hate Women Laura Bates, 2021-03-02. The first comprehensive undercover look at the terrorist movement, no one is talking about. *Men Who Hate Women* examines the rise of secretive extremist communities who despise women and traces the roots of misogyny across a complex spider web of groups. It includes eye-opening interviews with former members of these communities, the academics studying this movement, and the men fighting back. Women's rights activist Laura Bates wrote this book as someone who has been the target of many hate-fueled misogynistic attacks online. At first, the vitriol seemed to be the work of a small handful of individual men, but over time, the volume and consistency of the attacks hinted at something bigger and more ominous. As Bates went undercover into the corners of the internet, she found an unseen, organized movement of thousands of anonymous men wishing violence and worse upon women. In the book, Bates explores extreme communities like incels, pickup artists, MGTOW, Men's Rights Activists, and more. The hateful, toxic rhetoric used by these groups, how this movement connects to other extremist movements like white supremacy, how young boys are targeted and slowly drawn in, where this ideology shows up in our everyday lives in mainstream media, our playgrounds, and our government. By turns fascinating and horrifying, *Men Who Hate*

Women is a broad unflinching account of the deep current of loathing toward women and anti feminism that underpins our society and is a must read for parents educators and anyone who believes in equality for women Praise for Men Who Hate Women Laura Bates is showing us the path to both intimate and global survival Gloria Steinem Well researched and meticulously documented Bates s book on the power and danger of masculinity should be required reading for us all Library Journal Men Who Hate Women has the power to spark social change Sunday Times *In Plain Sight* Gaby Zipfel, Kirsten Campbell, Regina Mühlhäuser, (eds.),2019-12-10 In the mid 1970s at the peak of the women s movement feminist activism and research opened the door to questions that are still pressing today While sexual violence has gained public awareness and become a subject in academic debate efforts to understand and strategies to prevent this form of violence remain inadequate Who are the perpetrators How is sexual violence tied to other forms of violence What are the consequences for individual victims and societies Compiled by the International Research Group Sexual Violence in Armed Conflict SVAC this volume takes an interdisciplinary approach to understanding wartime sexual violence Its enquiry employs four key relationships War Power Violence Sexuality Gender Engendering and Visibility Invisibility Through these the authors identify gaps in existing knowledge to develop a deeper and more nuanced understanding of the field This volume is the result of long standing cooperation The International Research Group Sexual Violence in Armed Conflict SVAC is a network of interdisciplinary scholars and NGO experts founded in October 2010 Sociologists philosophers historians literary and legal scholars as well as NGO professionals from Europe the US Asia and Africa bring together empirical and theoretical studies focusing on sexual violence in different theatres of armed conflict The group compares source material and promotes the systematic development of research questions and methods **The Incel Rebellion** Lisa Sugiura,2021-11-05 The ebook edition of this title is Open Access thanks to Knowledge Unlatched funding and freely available to read online Drawing on ethnographic research and interviews this book provides an insight into the development of the manosphere and the extent to which the influence and philosophy of incel is penetrating mainstream culture *Urban Aesthetics in Early Modern London* Christopher D'Addario,2023-06-15 Tracing the demonstrative aesthetic shift in literary writings of fashionable London during the late 1590s this book argues that the new forms which emerged during this period were intimately linked arising out of a particular set of geographic intellectual and social circumstances that existed in these urban environs In providing a cohesive view of these disparate generic interventions Christopher D Addario breaks new ground in significant ways By paying attention to the relationship between environment and individual imagination he provides a fresh and detailed sense of the spaces and social worlds in which the writings of prominent authors including Thomas Nashe and John Donne were produced and experienced In arguing that the rise of the metaphysical aesthetic occurred across a number of urban genres throughout the 1590s not just in lyric but also earlier in Nashe s prose as well as in the verse satire he rewrites English Renaissance literary history itself **Global Trafficking in Women and Children** Obi N.I. Why We Need Religion Stephen T. Asma,2018-05-09 How we feel is as vital to our survival as how we think This claim based on the premise that emotions are largely adaptive serves as the organizing theme of Why We Need Religion This book is a novel pathway in a well trodden field of religious studies and philosophy of religion Stephen Asma argues that like art religion has direct access to our emotional lives in ways that science does not Yes science can give us emotional feelings of wonder and the sublime we can feel the sacred depths of nature but there are many forms of human suffering and vulnerability that are beyond the reach of help from science Different emotional stresses require different kinds of rescue Unlike secular authors who praise religion s ethical and civilizing function Asma argues that its core value lies in its emotionally therapeutic power No theorist of religion has failed to notice the importance of emotions in spiritual and ritual life but truly systematic research has only recently delivered concrete data on the neurology psychology and anthropology of the emotional systems This very recent affective turn has begun to map out a powerful territory of embodied cognition Why We Need Religion incorporates new data from these affective sciences into the philosophy of religion It goes on to describe the way in which religion manages those systems rage play lust care grief and so on Finally it argues that religion is still the best cultural apparatus for doing this adaptive work In short the book is a Darwinian defense of religious emotions and the cultural systems that manage them

Sensitive and exceptionally polished Manchester Evening News The Hillsbridge Sagas The Black Mountains The Emerald Valley The Hills and the Valley A Family Affair **Kill All Normies** Angela Nagle, 2017-06-07 Recent years have seen a revival of the heated culture wars of the 1990s but this time its battle ground is the internet On one side the alt right ranges from the once obscure neo reactionary and white separatist movements to geeky subcultures like 4chan to more mainstream manifestations such as the Trump supporting gay libertarian Milo Yiannopolous On the other side a culture of struggle sessions and virtue signalling lurks behind a therapeutic language of trigger warnings and safe spaces The feminist side of the online culture wars has its equally geeky subcultures right through to its mainstream expression Kill All Normies explores some of the cultural genealogies and past parallels of these styles and subcultures drawing from transgressive styles of 60s libertinism and conservative movements to make the case for a rejection of the perpetual cultural turn
