How to Enjoy Architecture Charles Holland, 2024-04-23 Charles Holland challenges us to look beyond the day to day familiarity of buildings to rediscover the pleasure of experiencing architecture Architecture is bound up with our daily lives but for most of us it is experienced as a blur of habit Our reactions towards the buildings that surround us are often culturally generated and we experience them in ways that are immediate but often mundane How to Enjoy Architecture A Guide for Everyone encourages us to move beyond this and instead really look at buildings Renowned architect Charles Holland talks about the buildings and architects that excite and inspire him and the ideas and principles through which we can engage with architecture By breaking buildings down into categories such as materials structure space and use Holland guides us through drastically different styles and building types from the satisfying symmetry of a Queen Anne house to the thrill of a high tech tower or the social ideals that lie behind a housing estate In doing so he demonstrates how looking at experiencing and using architecture can bring joy in itself A book that will enrich any encounter with a building it made me want to look harder and be more curious We are led playfully through the fundamentals of architecture so that we might enjoy the details and the poetry of buildings all the more A walk through the city feels more fun and also more profound after reading this book Grayson Perry artist We so often encounter architecture when it goes wrong or offends us with its looks Holland though is the perfect clear headed tour guide to help us appreciate it with newly sharpened senses and fall in love again even those buildings we think we hate Tom Dyckhoff academic and broadcaster An enlightening and urbane exploration of architecture that resonates beyond conventional chronological histories Catherine Slessor architecture writer and critic

Architecture In Use DJM van der Voordt, HBR van Wegen, 2007-06-01 This unique book discusses programming design and building evaluation providing a joined up approach to building design By linking the functional and architectonic qualities of a building the authors show the practical implications of the utility value of buildings Starting by looking at how the relationship between form and function has been dealt with by different approaches to architecture from a historical perspective it goes on to discuss how the desired functional quality and utility value of a building can be expressed in a brief and given a physical form by the architect Finally it advises on how to carry out post occupancy evaluation and provides the architect with methods and techniques for testing whether the intended utility value of a building has been achieved

Architecture and Adaptation Socrates Yiannoudes, 2016-01-29 Architecture and Adaptation discusses architectural projects that use computational technology to adapt to changing conditions and human needs Topics include kinetic and transformable structures digitally driven building parts interactive installations intelligent environments early precedents and their historical context socio cultural aspects of

adaptive architecture the history and theory of artificial life the theory of human computer interaction tangible computing and the social studies of technology Author Socrates Yiannoudes proposes tools and frameworks for researchers to evaluate examples and tendencies in adaptive architecture Illustrated with more than 50 black and white images **Architecture and Ritual** Peter Blundell Jones, 2016-08-25 Architecture and Ritual explores how the varied rituals of everyday life are framed and defined in space by the buildings which we inhabit It penetrates beyond traditional assumptions about architectural style aesthetics and utility to deal with something more implicit how buildings shape and reflect our experience in ways of which we remain unconscious Whether designed to house a grand ceremony or provide shelter for a daily meal all buildings coordinate and consolidate social relations by giving orientation and focus to the spatial practices of those who use them Peter Blundell Jones investigates these connections between the social and the spatial providing critical insights into the capacity for architecture to structure human ritual from the grand and formal to the mundane This is achieved through deep readings of individual pieces of architecture each with a detailed description of its particular social setting and use The case studies are drawn from throughout architectural history and from around the globe each enabling a distinct theoretical theme to emerge and showing how social conventions vary with time and place as well as what they have in common Case studies range from the Nuremberg Rally to the Centre Pompidou and from the Palace of Westminster to Dogon dwellings in Africa and a Modernist hospital In considering how all architecture has to mesh with the habits beliefs rituals and expectations of the society that created it the book presents deep implications for our understanding of architectural history and theory It also highlights the importance for architects of understanding how buildings frame social space before they prescribe new architectural designs of their own The book ends with a recent example of user participation showing how contemporary user interest and commitment to a building can be as strong as ever **Fun with Architecture** William Carruthers Cartner, 1968 *Architecture, Media, Archives* Ana Bonet Miró, 2024-08-22 Over 60 years on from its inception the celebrated Fun Palace civic project developed in the 1960s by the radical theatre director Joan Littlewood and the architect Cedric Price continues to capture the architectural imagination Despite the building itself never being realized much of the previous analysis of the Fun Palace has been devoted to Price and his drawings The critical role that Littlewood played however remains largely unrecognized by architectural scholarship and a whole area of the project's cultural agenda remains overlooked Architecture Media Archives is the first serious study of the complex relations between Littlewood and Price reframing the Fun Palace as an extended media project and positioning Littlewood more clearly as co designer Drawing on extensive archival material the book considers how due to a lack of institutional support the aims of the Fun Palace to transform the passive mass audiences of post war consumer society into active citizens through forms of self directed pleasure led and open exchange were realized through different sites of information throughout the 1960s From broadsheets pamphlets and journals to films and press news the book addresses the conditions of production circulation storage and

reception of these sites and reveals how they not only recorded the transformation of the project but also fundamentally enhanced and informed its meaning in specific ways The book also raises important questions about the agency of the Fun Palace archive in shaping the reception of the project in the decades since its inception presenting its analysis through a novel Fun Palace Reception Index and Chart fundamentally altering our view of the project itself and transforming the way in which we understand the technological and cultural production of the 1960s

Approaching Architecture Miguel Guitart,2022-09-30 The study of the architectural discipline suffers from an increasing disconnect between its teaching and its professional practice In this edited collection 18 architectural voices address this disconnect by reflecting on the ways in which they exercise the architectural discipline in three ways research teaching and practice This book argues that the totality of activities encompassed by the architectural profession can be best fulfilled when reconsidering the critical interactions between these three fields in the everyday exercise of the profession Split into three parts Architecture as Research Architecture as Pedagogy and Architecture as Practice each section focuses on one of these three dimensions while establishing continuity with the other two In doing so the book not only favors a more fulfilling interaction between academia and the profession but also reinforces the implementation of design theory and research in everyday teaching and practice The contributions come from 18 teams of architects operating from geographically diverse locations including Pezo von Ellrichshausen in Chile Kengo Kuma Associates in Japan Barclay Crousse in Peru Shift in Iran Heinrich Wolff in South Africa and People s Architecture Office in China opening the design conversation to larger contexts and framing continuity and inclusion in time Written for students instructors and practitioners alike the inspiring reflections in this volume encourage readers to grow as architects and play an instrumental role in transforming the built environment
