Caputo, 2005-01-17 *Foundations of Dynamic Economic Analysis* presents a modern and thorough exposition of the fundamental mathematical formalism used to study optimal control theory i e continuous time dynamic economic processes and to interpret dynamic economic behavior The style of presentation with its continual emphasis on the economic interpretation of mathematics and models distinguishes it from several other excellent texts on the subject This approach is aided dramatically by introducing the dynamic envelope theorem and the method of comparative dynamics early in the exposition Accordingly motivated and economically revealing proofs of the transversality conditions come about by use of the dynamic envelope theorem Furthermore such sequencing of the material naturally leads to the development of the primal dual method of comparative dynamics and dynamic duality theory two modern approaches used to tease out the empirical content of optimal control models The stylistic approach ultimately draws attention to the empirical richness of optimal control theory a feature missing in virtually all other textbooks of this type **Information Systems Development** George

Angelos Papadopoulos, Wita Wojtkowski, Gregory Wojtkowski, Stanislaw Wrycza, Jože Zupancic, 2009-09-23 This volume constitutes the published proceedings of the 17th International Conference on Information Systems Development They

present the latest and greatest concepts approaches and techniques of systems development a notoriously transitional field
