Handbook Of Social Functioning In Schizophrenia:

Handbook of Social Functioning in Schizophrenia Kim Tornvall Mueser, Nicholas Tarrier, 1998 It is now widely recognized that impairment in social functioning is one of the most enduring features of schizophrenia While some medications are effective in reducing psychotic symptoms they tend to have little or no effect on the social functioning of these patients To address the social needs of patients with schizophrenia increased attention has been paid to developing interventions designed to improve their social functioning However little is understood about the nature of these patients social deficits their origins course and response to treatment With increased efforts aimed at improving social functioning in schizophrenia there is a need for resources that summarize and synthesize recent findings related to this topic This is the most authoritative up to date comprehensive book available that examines social functioning in this disorder from a wide variety of perspectives This handbook is an important reference work that provides integrated summaries on topics of importance to clinicians and researchers including assessment phenomenology rehabilitation quality of life and more Clinicians and researchers working with schizophrenic patients It is also a useful addition to libraries A Longwood Professional Book

Handbook of Social and Evaluation Anxiety H. Leitenberg, 2013-11-11 For a long time I have wanted to put together a book about social and evaluation anxiety Social evaluation anxiety seemed to be a stressful part of so many people's everyday experience It also seemed to be a part of so many of the clinical problems that I worked with Common terms that fit under this rubric include fears of rejection humiliation criticism embarrassment ridicule failure and abandonment Examples of social and evaluation anxiety include shyness social inhibition social timidity public speaking anxiety feelings of self-consciousness and awkwardness in social situations test anxiety performance anxiety in sports theater dance or music shame guilt separation anxiety social withdrawal procrastination and fear of job interviews or job evaluations of asking someone out of not making a good impression or of appearing stupid foolish or physically unattractive In its extreme form social anxiety is a behavior disorder in its own right social phobia This involves not only feelings of anxiety but also avoidance and withdrawal from social situations in which scrutiny and negative evaluation are anticipated Social evaluation anxiety also plays a role in other clinical disorders For example people with agoraphobia are afraid of having a panic attack in public in part because they fear making a

spectacle of themselves Moreover even their dominant terrors of going crazy or having a heart attack seem to reflect a central concern with social abandonment and isolation
