Handbook Of Suicidology Principles Problems And Practice:

Handbook of Suicidology Louis Wekstein, 1979 Handbook of Suicidology Louis Wekstein, 1979 *The Sealed Box of Suicide* Colin Tatz, Simon Tatz, 2019-09-23 This unique book explores suicide as more than just a manner of death. It challenges the myths, beliefs, dogma, and customs of suicide from the earliest theories. It offers fresh insights into dark spaces. World-wide suicide deaths are three times greater than homicides and are increasing. Current approaches to stem this epidemic are not working or have very limited success. Mental health interventions, theories about a suicide or a depression gene, and the ever-increasing dispensing of antidepressants have not lessened the stark statistics. The authors attempt to understand the soul of the suicide, addressing the social, economic, political, historical, geographic, and cultural contexts in which suicide occurs. The social order is indelibly connected to settings, places, circumstances, relationships, occupations, climate, and milieu. Most of the 36 diverse categories of self-motivated deaths defy a one-size-fits-all approach. Recognising contexts and looking outside the confines that have imprisoned thinking about suicide could well be more effective in alleviating or mitigating suicide than years searching for a possible vaccination against such death. The book is an appeal to move beyond the medical model of suicide. Written in a very accessible style, it is of interest to social scientists, philosophers, professionals, and researchers in public health, medical, and behavioural sciences, and lay persons alike. A critical, stimulating, and moral tale of suicide that provides a new look. Michael J. Kral, PhD, School of Social Work, Wayne State University, Michigan, USA, a major breakthrough and a step in the right direction in addressing the problem of suicide. Said Shahtahmasebi, PhD, Research Director, the Good Life Research Centre Trust, Christchurch, New Zealand, informed understanding of suicide's multiplicity and historical instability. Jennifer White, PhD, School of Youth and Child Care, University of Victoria, British Columbia, Canada. Dying, Death, and Bereavement Lewis R. Aiken, 2001. This book is a brief but comprehensive survey of research writings and professional practices concerned with death and dying. It is interdisciplinary and eclectic. Medical, psychological, religious, philosophical, artistic, demographics, bereavement, and widowhood are all considered, but with an emphasis on psychological aspects. A variety of viewpoints and research findings on topics subsumed under thanatology receive thorough consideration. Questions, activities, and projects at the end of each chapter enhance reflection and personalize the material. This fourth edition features material on moral issues and court cases concerned with abortion and euthanasia, the widespread problem of AIDS and other deadly diseases, the tragedies occasioned by epidemics, starvation, and war, and the resumption of capital punishment in many states. The book's enhanced multicultural tone reflects the increased economic, social, and physical interdependency among the nations of the world. Topics receiving increased attention in the fourth edition are terror management, attitudes and practices concerning death, cross-cultural concepts of afterlife, gallows humor, out-of-body experiences, spiritualism, mass suicide, pet and romantic death, euthanasia, right to die, postbereavement depression, firearm deaths in children, children's understanding of death, child, adolescent, adult, and

physician assisted suicide religious customs and death confronting death legal issues in death dying and bereavement death education death music creativity and death longevity broken heart phenomenon beliefs in life after death new definitions of death children's acceptance of a parent's death terminal illness and the politics of death and dying The Broader View of Suicide Said Shahtahmasebi, Hatim A. Omar, 2020-03-20 Suicide is a leading cause of death globally and the second biggest cause of death in young people Over 800 000 people commit suicide annually While many approaches to suicide prevention have been proposed the only ones to show even limited success are those at the grassroots level involving everyone from parents to teachers health care providers and the community as a whole This book explores both current and outdated perceptions of suicide and presents a number of novel approaches and tools to prevent suicide *Preventing Adolescent Suicide* Dave Capuzzi, Larry B.
