The Oxford Handbook of Multicultural Identity

Veronica Benet-Martinez, Ying-Yi Hong, 2015-08-01

Multiculturalism is a prevalent worldwide societal phenomenon. Aspects of our modern life such as migration economic globalization multicultural policies and cross border travel and communication have made intercultural contacts inevitable. High numbers of multicultural individuals 23 43% of the population by some estimates can be found in many nations where migration has been strong e.g. Australia U.S. Western Europe Singapore or where there is a history of colonization e.g. Hong Kong. Many multicultural individuals are also ethnic and cultural minorities who are descendants of immigrants majority individuals with extensive multicultural experiences or people with culturally mixed families all people for whom identification and or involvement with multiple cultures is the norm. Despite the prevalence of multicultural identity and experiences until the publication of this volume there has not yet been a comprehensive review of scholarly research on the

psychological underpinning of multiculturalism The Oxford Handbook of Multicultural Identity fills this void It reviews cutting edge empirical and theoretical work on the psychology of multicultural identities and experiences As a whole the volume addresses some important basic issues such as measurement of multicultural identity links between multilingualism and multiculturalism the social psychology of multiculturalism and globalization as well as applied issues such as multiculturalism in counseling education policy marketing and organizational science to mention a few This handbook will be useful for students researchers and teachers in cultural social personality developmental acculturation and ethnic psychology It can also be used as a source book in advanced undergraduate and graduate courses on identity and multiculturalism and a reference for applied psychologists and researchers in the domains of education management and marketing
