Leadership for Equity and Diversity is the first research based handbook that comprehensively addresses the broad diversity in U S schools by race ethnicity culture language gender disability sexual identity and class The Handbook both highly values the critically important strengths and assets that diversity brings to the United States and its schools yet at the same time candidly critiques the destructive deficit thinking biases and prejudices that undermine school success for many groups of students Well known chapter authors explore diversity and related inequities in schools and the achievement problems these issues present to school leaders Each chapter reviews theoretical and empirical evidence of these inequities and provides research based recommendations for practice and for future research Celebrating the broad diversity in U S schools the Handbook of Research on Educational Leadership for Equity and Diversity critiques the inequities connected to that diversity and provides evidence based practices to promote student success for all children *Handbook of Research on the Education of School Leaders* Michelle D. Leithwood, P. Hallinger, 2012-12-06 The first International Handbook of Educational Leadership and Administration Leithwood et al was published in 1996 and quickly became something of a best seller for reference works within education Such success we suggest was at least partly due to the unprecedented global waves of concern for improving schools launched in the mid 1980 s combined with a widespread belief in leadership as the single most powerful contribution to such improvement The roots of this belief can be found in evidence produced by the early effective schools research although there is a romance with leadership as an explanation for success in many non school enterprises as well During the two year period during which this current handbook was being written activity in the realms of school leadership school improvement and leadership development gained further momentum The English government created its new National College of School Leadership and several Asian nations announced new initiatives in leadership selection preparation and development The SAGE Handbook for Research in Education Clifton F. **SOME KEY ASSUMPTIONS** It is sometimes suggested that the search for an adequate understanding of leadership is doomed to fail After all there is little evidence of agreement about the concept in spite of prodigious efforts dating back hundreds if not thousands of years Such a view is captured for example in Bennis observation that Of all the hazy and confounding areas in social psychology leadership theory undoubtedly contends for top nomination Probably more has been written and less is known about leadership than any other topic in the behavioural sciences 1959 page 259 We do not find this state of affairs discouraging nor entirely accurate and of course it did not prevent Bennis from proceeding either One reason for our desire to continue in the face of such discouraging words is that a great deal of leadership research aspires to develop a general theory a theory which applies to all or most domains of organized human activity This aspiration inevitably produces decontextualized and therefore abstract categories of practice

Howard Gardner's 1995 depiction of leadership as story telling is a case in point
