Aigen, 2013-12-04 This book addresses the issues in music therapy that are central to understanding it in its scholarly dimensions how it is evolving and how it connects to related academic disciplines It draws on a multi disciplinary approach to look at the defining issues of music therapy as a scholarly discipline rather than as an area of clinical practice It is the single best resource for scholars interested in music therapy because it focuses on the areas that tend to be of greatest interest to them such as issues of definition theory and the function of social context but also does not assume detailed prior knowledge of the subject Some of the topics discussed include defining the nature of music therapy its relation to current and historical uses of music in human well being and considerations on what makes music therapy work Contemporary thinking on the role of neurological theory early interaction theory and evolutionary considerations in music therapy theory are also reviewed Within each of these areas the author presents an overview of the development of thinking discusses contrasting positions and offers a personalized synthesis of the issue The Study of Music Therapy is the only book in music therapy that gathers all the major issues currently debated in the field providing a critical overview of the predominance of opinions on these issues *Code of Federal Regulations* United States. Department of Education, 1992 Special edition of the Federal register containing a codification of documents of general applicability and future effect as of July with ancillaries **Social Context Reform** Paul Thomas, Brad J. Porfilio, Julie Gorlewski, Paul R. Carr, 2014-06-20 Currently both the status quo of public education and the No Excuses Reform policies are identical The reform offers a popular and compelling narrative based on the meritocracy and rugged individualism myths that are supposed to define American idealism This volume will refute this ideology by proposing Social Context Reform a term coined by Paul Thomas which argues for educational change within a larger plan to reform social inequity such as access to health care food higher employment better wages and job security Since the accountability era in the early 1980s policy public discourse media coverage and scholarly works have focused primarily on reforming schools themselves Here the evidence that school only reform does not work is combined with a bold argument to expand the discourse and policy surrounding education reform to include how social school and classroom reform must work in unison to achieve goals of democracy equity and opportunity both in and through public education This volume will include a wide variety of essays from leading critical scholars addressing the complex elements of social context reform all of which address the need to re conceptualize accountability and to seek equity and opportunity in social and education reform
