The Digital Hand, Vol 3 James W. Cortada, 2007-11-06 In The third volume of The Digital Hand James W Cortada completes his sweeping survey of the effect of computers on American industry turning finally to the public sector and examining how computers have fundamentally changed the nature of work in government and education This book goes far beyond generalizations about the Information Age to the specifics of how industries have functioned now function and will function in the years to come Cortada combines detailed analysis with narrative history to provide a broad overview of computings and telecommunications role in the entire public sector including federal state and local governments and in K 12 and higher education Beginning in 1950 when commercial applications of digital technology began to appear Cortada examines the unique ways different public sector industries adopted new technologies showcasing the manner in which their innovative applications influenced other industries as well as the U S economy as a whole He builds on the surveys presented in the first volume of the series which examined sixteen manufacturing process transportation wholesale and retail industries and the second volume which examined over a dozen financial telecommunications media and entertainment industries With this third volume The Digital Hand trilogy is complete and forms the most comprehensive and rigorously researched history of computing in business since 1950 providing a detailed picture of what the infrastructure of the Information Age really looks like and how we got there Managers historians economists and those working in the public sector will appreciate

Cortada's analysis of digital technology's many roles and future possibilities Police Instructor Richard H. Neil (Sr.), Richard H. Neil, 2011 The knowledge that once required an instructor to read dozens of books and attend extensive training is now available through this innovative guide Police Instructor reveals the essential skills that a law enforcement trainer must possess to create an active learning environment Creative Slide Design Public Speaking Dynamic Delivery Storytelling as a Training Tool Engaging Effective Humor Group Facilitation Experience Based Training Speech Design and Delivery Dealing with Disruptive Students and Managing Law Enforcement Cadet Learning Styles LEOtrainer.com is a companion resource for Police Instructor The website is filled with slide show presentations images videos training materials free resources and other information that will aid anyone involved with training law enforcers Whether you are teaching a class of cadets field training a rookie delivering a civic speech serving as an SRO or conducting roll call training this book is for you Society has placed the highest expectations possible on the law enforcement trainer Police Instructor will help you exceed them **Fatal Abstraction: Why the Managerial Class Loses Control of Software** Darryl Campbell, 2025-04-08 A tech insider explains how capitalism and software development make for such a dangerous mix Software was supposed to radically improve society Outdated mechanical systems would be easily replaced programs like PowerPoint would make information flow more freely social media platforms like Facebook would bring people together and generative AI would solve the world's greatest ills Yet in practice few of the systems we looked to with such high hopes have lived up to their fundamental mandate In fact in too many cases they've made things worse exposing us to immense risk at the societal and the individual levels How did we get to this point In Fatal Abstraction Darryl Campbell shows that the problem is managerial software programs created and overseen not by engineers but by professional managers with only the most superficial knowledge of technology itself The managerial ethos dominates the modern tech industry from its globe spanning giants all the way down to its trendy startups It demands that corporate leaders should be specialists in business rather than experts in their company's field that they manage their companies exclusively through the abstractions of finance and that profit margins must take priority over developing a quality product that is safe for the consumer and beneficial for society These corporations rush the development process and package cheap unproven potentially dangerous software inside sleek and shiny new devices As Campbell demonstrates the problem with software is distinct from that of other consumer products because of how quickly it can scale to the dimensions of the world itself and because its inner workings resist the efforts of many professional managers to understand it with their limited technical background A former tech worker himself Campbell shows how managerial software fails and when it does what sorts of disastrous consequences ensue from the Boeing 737 MAX crashes to a deadly self-driving car to PowerPoint propaganda and beyond Yet just because the tech industry is currently breaking its core promise does not mean the industry cannot change or that the risks posed by managerial software should necessarily persist into the future Campbell argues that the solution is tech workers with actual expertise establishing

industry wide principles of ethics and safety that corporations would be forced to follow Fatal Abstraction is a stirring rebuke of the tech industry s current managerial excesses and also a hopeful glimpse of what a world shaped by good software can offer
