A. Burrow, 2020-12-07 The fourth edition of this essential Middle English textbook introduces students to the wide range of literature written in England between 1150 and 1400 Beginning with an extensive overview of middle English history grammar syntax and pronunciation the book goes on to examine key middle English texts including a new extract from Julian of Norwich's Revelation of Divine Love with helpful notes to direct students to key points within the text Keeping in mind adopter feedback this new edition includes a new model translation section with a student workbook

The Middle English Book Michael Johnston, 2023-07-25 The monograph series Oxford Studies in Medieval Literature and Culture showcases the plurilingual and multicultural quality of medieval literature and actively seeks to promote research that not only focuses on the array of subjects medievalists now pursue in literature theology and philosophy in social political jurisprudential and intellectual history the history of art and the history of science but also that combines these subjects productively It offers innovative studies on topics that may include but are not limited to manuscript and book history languages and literatures of the global Middle Ages race and the post colonial the digital humanities media and performance music medicine the history of affect and the emotions the literature and practices of devotion the theory and history of gender and sexuality ecocriticism and the environment theories of aesthetics medievalism The Middle English Book addresses a series of questions about the copying and circulation of literature in late medieval England How do we make sense of the variety of manuscripts surviving from this period Who copied and disseminated these diverse manuscripts Who read the literary texts that they transmit And what was the relationship between those copying literature and those reading it To answer these questions this book examines 202 literary manuscripts from the period 1350 to 1500 First this study suggests that most surviving manuscripts fall into four categories depending on the proximity and relationship of that manuscript s scribes and readers But beyond proposing these new categories this book also looks at the history of writing practices and demonstrates the ubiquity of bureaucracies within late medieval England As a result The Middle English Book argues that literary production was a decentered affair one that took place within these numerous modest yet complex bureaucracies But this book also argues that because literary production arose in such scattered bureaucracies manuscripts were local products produced within the cultural and economic milieu of their users Manuscripts thus form a fundamentally different sort of cultural artefact than the printed books with which we are familiar a form of centralized urbanized and commercialized textual production that was just over the historical horizon in late medieval England

The church as sacred space in Middle English literature and culture Laura Varnam, 2018-01-11 This book presents an exciting new approach to the medieval church by examining the role of literary texts visual decorations ritual performance and lived experience in the production of sanctity The meaning of the church was intensely debated in the fourteenth and fifteenth centuries This book explores what was at stake not only for the church s sanctity but for the identity of the parish community as a result Focusing on pastoral material used to teach the laity it shows how the church s status as a sacred space at the heart of the congregation was dangerously but profitably dependent on lay practice The sacred and profane were inextricably linked and paradoxically the

church is shown to thrive on the sacrilegious challenge of lay misbehaviour and sin Middle English Laurel Brinton, Alexander Bergs, 2017-09-25 The volume provides a wide ranging account of Middle English organized by linguistic level Not only are the traditional areas of linguistic study explored in state of the art chapters but the volume also covers less traditional areas of study including creolization sociolinguistics literary language including the language of Chaucer pragmatics and discourse dialectology standardization language contact and multilingualism **Introduction to Middle English** Simon Horobin, 2016-09-09 GBS_insertPreviewButtonPopup ISBN 9780748614813 An Introduction to Middle English is designed to provide undergraduate students of English historical linguistics with a concise description of the language during the period 1100 1500 Middle English the language of Chaucer is discussed in relation to both earlier and later stages in the history of English and in relation to other languages with which it came into contact Key Features presents the historical and geographical contexts of Middle English examines the evidence for Middle English introduces the principal features of Middle English spelling pronunciation grammar and vocabulary includes an introduction to Middle English textual studies selected Middle English texts both literary and non literary notes glossaries and annotated bibliographies and questions for review Most other introductory books on Middle English focus on literary rather than linguistic matters this book is designed to redress the balance by providing students of English language with an up to date authoritative survey which takes account of recent trends in historical linguistics One Hundred Middle English Lyrics Robert David Stevick, 1994 Stevick's classic work remains the only text of its kind aimed at fostering the linguistic competence necessary to understand its poems in Middle English The wide range of lyric poems in the book are normalized to a Chaucerian dialect The introduction has been revised to take into account the scholarship and criticism published since the first edition appeared in 1964 It gives the background for the poetry explains how and why the texts are normalized and reviews significant critical scholarly studies of the works Included is a section on morphology and grammar that introduces students to the language of the lyrics and a section on the evolving meter of Middle English A fine piece of work Learned wide ranging and judicious John B Friedman author of *The Monstrous Races in Medieval Art and Thought* An impressive collection Stevick's decision to normalize the texts makes it highly accessible Ralph Hanna III University of California Riverside

Supplement to the Index of Middle English Verse Rossell Hope Robbins, John L. Cutler, 2014-07-15 Rossell Hope Robbins collaborated with Carleton Brown in the publishing of the Index of Middle English Verse in 1943 With John L Cutler associate professor of English in the University of Kentucky he has now compiled a supplement to the Index incorporating those texts published since 1943 At the same time the two have completely revised the Index by including in the Supplement texts previously neglected The number of entries has been increased to 6 000 and more than half of the 4 500 original entries have been revised In addition to this basic revision the appendices of the Index have been corrected and enlarged especially the listing and locating of privately held manuscripts Cross references have been inserted abundantly to facilitate easy use of

the combined works Additionally reference has been made to related specialized studies The large number of new entries is attributable not only to prolonged manuscript research but also to a broadening of the original criteria for the inclusion of poems Rather than cutting off entries at 1500 which the authors felt impaired the usefulness of the original Index Robbins and Cutler included genres that had not concluded but continued into the sixteenth century as well as poems with uncertain dates they felt would be important for scholars The Supplement overcomes these barriers by including the so called Scottish Chaucerians the late fifteenth and early sixteenth century manuscripts such as the Tudor songbooks verse items of only two lines and tombstone and church bras epitaphs

Approaches to Teaching the Middle English Pearl Jane Beal, Mark Bradshaw Busbee, 2018-01-01 The moving richly allegorical poem Pearl was likely written by the anonymous poet who also penned Sir Gawain and the Green Knight In it a man in a garden grieving the loss of a beloved pearl dreams of the Pearl Maiden who appears across a stream She teaches him the nature of innocence God's grace meekness and purity Though granted a vision of the New Jerusalem by the Pearl Maiden the dreamer is pained to discover that he cannot cross the stream himself and join her in bliss at least not yet This extraordinary poem is a door into late medieval poetics and Catholic piety Part 1 of this volume Materials introduces instructors to the many resources available for teaching the canonical yet challenging Pearl including editions translations and scholarship on the poem as well as its historical context The essays in part 2 Approaches offer instructors tools for introducing students to critical issues associated with the poem such as its authorship sources and analogues structure and language and relation to other works of its time Contributors draw on interdisciplinary approaches to outline ways of teaching Pearl in a variety of classroom contexts

An Historical Study of English Jeremy J. Smith, 1996 Through his analysis of selected major developments in the history of English Smith argues that the history of language can only be understood from a dynamic perspective and internal linguistic change mechanisms cannot be explained in isolation
