**From the Channel to the Ypres Salient** Chris Baker, 2021-10-31 The sector north of Ypres is best known for the inundation of much of the ground to the east of the Yser that acted as a block to the German advance in the autumn of 1914 From that time on military activities were extremely limited Much of this line was manned by Belgian troops with some assistance from the French army at its southern end and of the British army on the Channel coast The role of the Belgian army in the Great War is little known apart from the opening months when brave little Belgium held on to its important fortified cities notably Liege and Antwerp for longer than German planning had anticipated It was not until mid October 1914 that the Belgian army was forced back to the area of the Yser when its defences were bolstered by French troops whilst Haig's I Corps came up on its southern flank At this crucial phase of the campaign the harsh decision was taken to open the dykes at the end of October 1914 and thereby flooding much of the low lying ground east of the Yser and so effectively halting major German offensive operations For almost four years the Belgian army rested reasonably secure behind this sodden landscape although certain key points were the scene of frequent if limited tussles Free Belgium was reduced to two significant towns that could be regarded as secure and out of the range of most German artillery the coastal resort of La Panne De Panne and the much bigger settlement of Furnes Veurne Over these years the Belgian army was rebuilt under the dynamic leadership of the king Albert I and by the time of the general allied advance in September 1918 the Belgian army was able to take its place in the Advance to Victory in an allied Army that was commanded by King Albert Although this phase of the war is outside the scope of the book it is important to realise that the Belgian army was a very active player in these last few months Amongst the achievements of Belgian troops at this stage of the war was the final capture of Passchendaele This book concerns itself with the years of defence and the reconstruction of the army behind the Yser Relatively little of Belgium's efforts in the Great War remained but recent years have seen action to preserve what does Most significant of these perhaps is the so called Trench of Death near Diksmuide Although always preserved it has recently been very successfully refurbished and is now most effectively and informatively presented Other remains from the war have also been developed so as to be more informative and the result is that touring this area provides a fascinating insight into one of the most unusual sectors of the Western Front and which is conveniently close to the much visited Ypres Salient In this book Chris Baker brings his extensive knowledge of the Belgian army helped by his ability to read French and Dutch and of the Flanders region to produce a much needed insight into Belgium's army role for most of the war as the protector of the northern flank of the whole of the Allied line

August 1914 would have been a clear front runner with a century long record of impressive victories and a general staff the envy of its rivals Germany's overall failure in the first year of World War I was surprising and remains a frequent subject of analysis mostly focused on deficiencies in strategy and policy But there were institutional weaknesses as well This book examines the structural failures that frustrated the Germans in the war's crucial initial campaign the invasion of Belgium Too much routine in planning command and execution led to groupthink inflexibility and to an overconfident belief that nothing could go too terribly wrong As a result decisive operation became dicey with consequences that Germany's military could not overcome in four long years
