Handbook Of War Studies II:

Handbook of War Studies II Manus I. Midlarsky, 2000 Essays reflecting the most recent theoretically and empirically oriented research on international warfare **Handbook of War Studies III** Manus I. Midlarsky, 2009-08-12 Original work from leading international relations scholars on domestic strife ethnic conflict and genocide Handbook of War Studies Midlarsky Manus, 2011 First published in 1989 the Handbook of War Studies offers a systematic overview of empirically based theories of international conflict In this definitive sourcebook leading scholars of international relations provide a comprehensive survey of contemporary theories and methodological approaches to the study of war This comprehensive volume will be essential reading for students and teachers of international relations military and strategic studies and war and peace studies **Globalization and Global History** Barry K. Gills, William Thompson, 2012-11-12 Globalization and Global History argues that globalization is not an exotic and new phenomenon Instead it emphasizes that globalization is something that has been with us as long as there have been people who are both interdependent and aware of that fact Studying globalization from the vantage point of long term global history permits theoretical and empirical investigation allowing the authors collected to assess the extent of ongoing transformations and to compare them to earlier iterations With this historical advantage the extent of ongoing changes which previously appeared unprecedented can be contrasted to similar episodes in the past The book is divided into three sections The first focuses on how globalization has been written about from a historical perspective The second part advances three different takes on how best to view globalization from a very long term stance The final section continues this interpretative thread by examining more narrow aspects of globalization processes ranging from incorporation processes to systemic disruptions **When the Stakes Are High** Vesna Danilovic, 2010-06-04 When the Stakes Are High is based on the premise that powers have continually played a decisive role in international conflicts Consequently one of the key questions concerns the conditions that are likely to trigger or abate dispute escalation into major power conflicts In this book Vesna Danilovic provides a rigorous theoretical and empirical analysis of these conditions Since the most precarious and common form of dispute between major powers arises over third nations the author's primary focus is on so called extended deterrence In this type of deterrence one side attempts to prevent another side from initiating or escalating conflict with a third nation When the Stakes Are High addresses such questions as When is extended deterrence likely to be effective What happens if deterrence fails In what circumstances is war likely to result from a deterrence failure The author's main argument is that a major power's national interests which shape the inherent credibility of threats and which are shaped by various regional stakes set the limits to the relevance of other factors which have received greater scholarly attention in the past Strongly supported by the empirical findings the arguments in this work draw important implications for conflict theory and deterrence policy in the post Cold War era This book will appeal to the reader interested in international relations in general and in theories of international conflict deterrence causes

of wars great power behavior and geopolitics in particular Vesna Danilovic is Assistant Professor of Political Science Texas A M University *Regional Leadership in the Global System* Daniel Flomes,2016-04-08 We assume that the ideas interests and strategies of regional powers are highly significant variables with the power to influence foreign policy Yet while comparative research projects involving OECD countries are fairly common comparative research integrating developing regions is still rare despite the fact that these countries are among the key actors of the twenty first century This collection emphasizes the role of regional powers in intra regional interregional and global contexts analyzing the rise of regional powers from a comparative perspective In so doing the book explains how these powers have power to shape regional and global politics **Paying the Human Costs of War** Christopher Gelpi,Peter D. Feaver,Jason Reifler,2009-02-09 From the

Korean War to the current conflict in Iraq Paying the Human Costs of War examines the ways in which the American public decides whether to support the use of military force Contrary to the conventional view the authors demonstrate that the public does not respond reflexively and solely to the number of casualties in a conflict Instead the book argues that the public makes reasoned and reasonable cost benefit calculations for their continued support of a war based on the justifications for it and the likelihood it will succeed along with the costs that have been suffered in casualties Of these factors the book finds that the most important consideration for the public is the expectation of success If the public believes that a mission will succeed the public will support it even if the costs are high When the public does not expect the mission to succeed even small costs will cause the withdrawal of support Providing a wealth of new evidence about American attitudes toward military conflict Paying the Human Costs of War offers insights into a controversial timely and ongoing national discussion

Perfect Deterrence Frank C. Zagare,D. Marc Kilgour,2000-09-21 An important and timely contribution to International Relations and political science this is the first general analysis of deterrence since the end of the Cold War Using non cooperative game theory the authors develop a new approach to deterrence Perfect Deterrence Theory which they apply to unilateral and mutual direct deterrence relationships and to extended deterrence relationships supported by deployment policies such as Massive Retaliation and Flexible Response The authors focus on the relationship among capabilities preferences credibility and outcomes to achieve a new understanding of threats and responses Some surprising conclusions emerge indicating that credible threats to respond to attack can sometimes make an attack more likely and that incredible response threats can sometimes promote peace With the application of deterrence theory in diverse social settings and historical examples from before during and after the Cold War this book provides a welcome new examination of the subject

International Processes Sara McLaughlin Mitchell, Paul F. Diehl, James D. Morrow, 2012-07-17 Dedicated to the empirical analysis of data from the world of international relations SSIP scholars tend to focus on interstate conflicts civil wars and conflict management The range of perspectives in this edited volume provide a comprehensive introduction to SSIP theory and methodology Fresh approach traces intellectual development of research approaches rather than merely summarizing results Features original SSIP material not found in other books Includes a number of essays with a broader assessment of SSIP methods ideal for younger scholars interested in the approach Includes recent SSIP analyses exploring issues such as civil wars

Acting Alone Bradley F. Podliska, 2010-02-15 Acting Alone A Scientific Study of American Hegemony and Unilateral Use of Force Decision Making is a straight forward analysis of unilateral U S military actions which are dependent upon the power disparity between the U S and the rest of the world In solving the puzzle as to why individual presidents have made the wrong decision to act alone the author lays out a president s behavior during a crisis as a two step decision process Acting Alone reviews the well studied first decision deciding to use force based on international conflict literature and organized along traditional lines The author then details the second decision deciding to use unilateral force with an explanation of the criticisms of multilateralism and the reasons for unilateralism To test a new theory of unilateral use of force decision making Acting Alone devises a definition and coding rules for unilateral use of force develops a sequential model of presidential use of force decision making and constructs a new alternative measure of military power a Composite Indicator of Military Revolutions CIMR It then uses three methods a statistical test with a heckman probit model an experiment and case studies to test U S crisis behavior since 1937 By applying these three methods the author finds that presidents are realists and make expected utility calculations to act unilaterally or multilaterally after their decision to use force The unilateral decision in particular positively correlates with a wide military gap with an opponent an opponent located in the Western hemisphere and a national security threat

International Relations Theory and the Consequences of Unipolarity G. John Ikenberry, Michael Mastanduno, William C. Wohlforth, 2011-09-01 The end of the Cold War and subsequent dissolution of the Soviet Union resulted in a new unipolar international system that presented fresh challenges to international relations theory Since the Enlightenment scholars have speculated that patterns of cooperation and conflict might be systematically related to the manner in which power is distributed among states Most of what we know about this relationship however is based on European experiences between the seventeenth and twentieth centuries when five or more powerful states dominated international relations and the latter twentieth century when two superpowers did so Building on a highly successful special issue of the leading journal World Politics this book seeks to determine whether what we think we know about power and patterns of state behaviour applies to the current unipolar setting and if not how core theoretical propositions about interstate interactions need to be revised

Territory, War, and Peace John A. Vasquez, Marie T. Henahan, 2023-04-14 This book presents a collection of new and updated essays on what has come to be known as the

territorial explanation of war The book argues that a key both to peace and to war lies in understanding the role territory plays as a source of conflict and inter group violence Of all the issues that spark conflict territorial disputes have the highest probability of escalating to war War however is hardly inevitable much depends on how territorial issues are handled More importantly settling territorial disputes and establishing mutually recognized boundaries can produce long periods of peace between neighbors even if other salient issues arise While territory is not the only cause of war and wars arise from other issues territory is one of the main causes of war and learning how to manage it can in principle eliminate an entire class of wars This book will be of great interest to all students of war and conflict studies causes of war and peace international security and strategic studies John A Vasquez is Thomas B Mackie Scholar in International Relations at the University of Illinois Urbana Champaign He is author of *The Steps to War* 2008 with Paul Senese and *The War Puzzle Revisited* 2009 He has been president of the Peace Science Society International and the International Studies Association Marie T Henehan is Director of Internships and Lecturer Department of Political Science at the University of Illinois Urbana Champaign She is author of *Foreign Policy and Congress An International Relations Perspective* and co editor of *The Scientific Study of Peace and War*

The Waning of Major War Raimo Vayrynen, 2013-10-31 This book is a systematic effort by leading international scholars to map the trends in major power warfare and explore whether it is waxing or waning The main point of departure is that major power war as a historical institution is in decline This does not mean though that wars between states are in general disappearing While there is some convergence in the conclusions by individual authors they are by no means unanimous about the trend The articles explore different causes and correlates of the declining trend in major power warfare including the impact of the international structure nuclear weapons international law multilateral institutions sovereignty and value changes

International Relations in the Cyber Age Nazli Choucri, David D. Clark, 2019-04-09 A foundational analysis of the co evolution of the internet and international relations examining resultant challenges for individuals organizations firms and states In our increasingly digital world data flows define the international landscape as much as the flow of materials and people How is cyberspace shaping international relations and how are international relations shaping cyberspace In this book Nazli Choucri and David D Clark offer a foundational analysis of the co evolution of cyberspace with the internet as its core and international relations examining resultant challenges for individuals organizations and states The authors examine the pervasiveness of power and politics in the digital realm finding that the internet is evolving much faster than the tools for regulating it This creates a co evolution dilemma a new reality in which digital interactions have enabled weaker actors to influence or threaten stronger actors including the traditional state powers Choucri and Clark develop a new method for addressing control in the internet age control point analysis and apply it to a variety of situations including major actors in the international and digital realms the United States China and Google In doing so they lay the groundwork for a new international relations theory that reflects the reality in which we live one in

which the international and digital realms are inextricably linked and evolving together China's Struggle for Status Yong Deng, 2008-04-28 At the end of the Cold War the People's Republic of China found itself in an international crisis facing severe problems in both domestic politics and foreign policy Nearly two decades later Yong Deng provides an original account of China's remarkable rise from the periphery to the center stage of the post Cold War world Deng examines how the once beleaguered country has adapted to and proactively realigned the international hierarchy great power politics and its regional and global environment in order to carve out an international path within the globalized world Creatively engaging with mainstream international relations theories and drawing extensively from original Chinese material this is a well grounded assessment of the promises and challenges of China's struggle to manage the interlacing of its domestic and international transitions and the interactive process between its rise and evolving world politics **Rethinking Violence** Erica Chenoweth, Adria Lawrence, 2010-08-27 An original argument about the causes and consequences of political violence and the range of strategies employed States nationalist movements and ethnic groups in conflict with one another often face a choice between violent and nonviolent strategies Although major wars between sovereign states have become rare contemporary world politics has been rife with internal conflict ethnic cleansing and violence against civilians This book asks how why and when states and non state actors use violence against one another and examines the effectiveness of various forms of political violence In the process of addressing these issues the essays make two conceptual moves that illustrate the need to reconsider the way violence by states and non state actors has typically been studied and understood The first is to think of violence not as dichotomous as either present or absent but to consider the wide range of nonviolent and violent options available and ask why actors come to embrace particular strategies The second is to explore the dynamic nature of violent conflicts developing explanations that can account for the eruption of violence at particular moments in time The arguments focus on how changes in the balance of power between and among states and non state actors generate uncertainty and threat thereby creating an environment conducive to violence This innovative way of understanding violence deemphasizes the role of ethnic cleavages and nationalism in modern conflict Contributors Kristin M Bakke Emily Beaulieu H Zeynep Bulutgil Erica Chenoweth Kathryn McNabb Cochran Kathleen Gallagher Cunningham Alexander B Downes Erin K Jenne Adria Lawrence Harris Mylonas Wendy Pearlman Maria J Stephan
