Handbook Of Women Stress And Trauma:

Handbook of Women, Stress and Trauma Kathleen A. Kendall-Tackett, 2013-01-11 The Handbook of Women Stress and Trauma focuses on the stresses and traumas that are unique to the lives of women. It is the first text to merge research from the fields of trauma and women's health and development. Using a lifespan developmental approach, the text begins by addressing specific issues women face in their lives, drawing upon theories of development and exploring how women's relationships with others buffer or sometimes cause stress and trauma. Combining aspects of female development with empirical data from the fields of women's health, family violence, and stress and coping, this volume helps sensitive care providers to the specific needs of women exposed to traumatic events. Trauma, Dissociation and Health Kathleen

Kendall-Tackett, Bridget Klest, 2013-09-13 This book explores the impact of trauma and dissociation on physical health throughout the lifespan. Important chronic conditions such as cardiovascular disease and chronic pain are examined. In addition, trauma in childbearing women is considered, specifically examining the short and long term effects of the birth experience itself. Dissociation's effect on long term health is also described and how it might manifest in patients in health care settings. This book was based on a special issue of Journal of Trauma Dissociation. **International Handbook of**

Human Response to Trauma Arieh Y. Shalev, Rachel Yehuda, Alexander C. McFarlane, 2013-11-11 In 1996, representatives from 27 different countries met in Jerusalem to share ideas about traumatic stress and its impact. For many, this represented the first dialogue that they had ever had with a mental health professional from another country. Many of the attendees had themselves been exposed to either personal trauma or traumatizing stories involving their patients and represented countries that were embroiled in conflicts with each other. Listening to one another became possible because of the humbling humanity of each participant and the accuracy and objectivity of the data presented. Understanding human traumatization had thus become a common denominator binding together all attendees. This book tries to capture the spirit of the Jerusalem World Conference on Traumatic Stress, bringing forward the diversities and commonalities of its constructive discourse. In trying to structure the various themes that arose, it was all too obvious that paradigms of different ways of conceiving of traumatic stress should be addressed first. In fact, the very idea that psychological trauma can result in mental health symptoms that should be treated has not yet gained universal acceptability. Even within medicine and mental health, competing approaches about the impact of trauma and the origins of symptoms abound. Part I discusses how the current paradigm of traumatic stress disorder developed within the historical, social, and process contexts. It also grapples with some of the difficulties that are presented by this paradigm from anthropologic, ethical, and scientific perspectives. Handbook of Forensic Mental
