**Natural Toxins** C.L. Ownby,G.V. Odell,2013-10-22 The 9th World Congress on Animal Plant and Microbial Toxins was

sponsored by the International Society on Toxinology which recently celebrated its 25th anniversary The Society was organized to promote research into all aspects of natural toxins and to help with the dissemination of knowledge This book presents the most recent information on natural toxins from animal plant and microbial origins and describes the state of research and clinical studies in the field The material included is illustrated referenced and fully indexed Natural Toxins 2 Bal Ram Singh,Anthony T. Tu,2012-12-06 From beach encounters aquaculture perils and processed food poisoning to snake bites and biological warfare natural toxins seem never to be far from the public s sight A better understanding of toxins in terms of their origin structure structure function relation ships mechanism of action and detection and diagnosis is of utmost importance to human and animal food safety nutrition and health In addition it is now clear that many of the toxins can be used as scientific tools to explore the molecular mechanism of several biological processes be it a mechanism involved in the function of membrane channels exocytosis or cytotoxicity Several of the natural toxins have also been approved as therapeutic drugs which has made them of interest to several pharmaceutical companies For example botulinum neurotoxins which have been used in studies in the field of neurobiology have also been used directly as therapeutic drugs against several neuromus cular diseases such as strabismus and blepharospasm Toxins in combination with modem biotechnological approaches are also being investigated for their potential use against certain deadly medical problems For example a combination of plant toxin ricin and antibodies is being developed for the treatment of tumors The great potential of natural toxins has attracted scientists of varying backgrounds pure chemists to cancer biologists to the study of fundamental aspects of the actions of these toxins *Handbook of Natural Toxins* ,1983 Handbook of Natural Toxins Richard F.
