Handbook Of The Psychophysiology Of Human Eating:

Handbook of the Psychophysiology of Human Eating Richard Shepherd, **Handbook of the Psychophysiology of Human Eating** R. Shepherd, 1989-09-22 This book looks at the psychology of eating Through an interdisciplinary approach the text examines eating from the study of neural processes affecting food intake through the experimental manipulation of taste and other sensory properties of foods the influence of nutrients on behavior and health clinical and research studies of weight control and socio cultural influences on food characteristics and nutritional behavior **Food, People and Society** Lynn J. Frewer, Einar Risvik, Hendrik Schifferstein, 2013-03-09 Food consumption is vital to human survival Nevertheless the exact determinants of food perception liking and food choice are still not fully understood Food People and Society tries to fill some of the gaps in our knowledge by studying these processes from multiple perspectives each with their own emphasis Some approaches focus mainly on the characteristics of food products eaten some focus on the person who eats a particular food whereas other approaches emphasize the psychological economic or social context in which food consumption takes place By bringing together these different approaches in one book we open the opportunity to integrate different perspectives and to facilitate comprehension of the complex processes that drive food choice behaviour Food People and Society is written for a wide audience including students and academics interested in food perception and consumption policy makers health educators and nutritionists food manufacturers and food marketers **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), 1990 **Current Catalog** National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70 Food Choice, Acceptance and Consumption H.J.H. MacFie, Herbert L. Meiselman, 2012-12-06 It is critical for the food industry to maintain a current understanding of the factors affecting food choice acceptance and consumption since these influence all aspects of its activities This subject has matured in recent years and for the first time this book brings together a coherent body of knowledge which draws on the experiences in industrial and academic settings of an international team of authors Written for food technologists and marketers the book is also an essential reference for all those concerned with the economic social and psychological aspects of the subject

Neurophysiology of Ingestion D. A. Booth, 1993-11-24 *Neurophysiology of Ingestion* Consumption in the Age of Affluence Ben Fine, Michael Heasman, Judith Wright, 2002-03-11 With growing affluence in the developed world food has become an increasing focus for attention Here the authors argue that in order to understand the extensive and dramatic developments in the world of food a new interdisciplinary approach is necessary The Age of Affluence successfully addresses food consumption in this way The volume argues the importance of socioeconomic and cultural factors over diet in influencing the production marketing and consumption of different groups of foods places food systems theory on sound analytical foundations draws critically upon food systems literature includes case studies from the sugar dairy and meat systems employs novel statistical techniques to identify and explain distinct patterns of food consumption The book will help

to revitalize the discipline of food studies and points the way forward for the continuing study of food consumption As such it will be invaluable to students researchers and policymakers engaged in the world of food Diet Diversification and Health Promotion I. Elmadfa, 2005 About half of the global burden of disease is due to chronic noncommunicable diseases such as obesity metabolic disorders cardiovascular diseases and cancer which are all related to modifiable risk factors such as unbalanced diet and malnutrition as well as determinants such as behavior and lifestyle Dietary patterns during the last few decades have undergone a general shift towards high energy density and fatty foods combined with a low proportion of plant components The resulting diet profile has proven inadequate to meet the physiological needs of a healthy human life A comprehensive and highly valuable source of knowledge for all professionals interested in the underlying causes of today's major health challenges this publication gives an in depth view of the various methods of monitoring and addressing this precarious situation impact of gender and age on eating behavior role of a vegetarian lifestyle processed and fortified foods organic foods ethnic food culture and consumer choice Sustainable Protein Production and Consumption: Pigs or Peas? Harry Aiking, Joop de Boer, Johan Vereijken, 2006-10-12 Sustainable Protein Production and Consumption Pigs or Peas is a book that presents and explores the PROFETAS programme for development of a more sustainable food system by studying the feasibility of substituting meat with plant based alternatives The emphasis is on improving the food system by reducing the use of energy land and freshwater at the same time limiting the impacts on health and animal welfare associated with intensive livestock production It is clear that such a new perspective calls not only for advanced environmental and technological research but also for in depth societal research as the acceptance of new food systems is critically contingent on perceptions and attitudes of modern consumers In this unique multidisciplinary setting PROFETAS has opened up pathways for a major transition in protein food production and consumption not by just analyzing the food chain but rather by exploring the entire agricultural system including biomass for energy production and the use of increasingly scarce freshwater resources The study presented here is intended to benefit every stakeholder in the food chain from policymakers to consumers and it offers guiding principles for a transition towards an ecologically and socially sustainable food system from a multi level perspective Mini Nutritional Assessment (MNA): Research and Practice in the Elderly B. Vellas, P. J. Garry, Philip J. Garry, Y. Guigoz, 1999-07 This book is the first of a new series which will present the proceedings of the newly established Nestlé Nutrition Workshop Series Clinical Performance Programme aimed at adult nutrition Undernutrition is a common phenomenon in elderly people and malnutrition reaches significant levels in those being in hospital nursing homes or home care programs Consequences of malnutrition often go unrecognised owing to the lack of specific validated instruments to assess nutritional status in frail elderly persons The Mini Nutritional Assessment MNA provides a single rapid assessment of nutritional status in the elderly of different degrees of independence allowing the prevalence of protein energy malnutrition to be determined and to evaluate the efficacy of nutritional intervention and strategies Easy quick and

economical to perform it enables staff to check the nutritional status of elderly people when they enter hospitals or institutions and to monitor changes occurring during their stay Moreover the MNA is predictive of the cost of care and length of stay in hospital This publication will be of immense assistance to heads of geriatric teaching units teachers in nutrition clinicians general practitioners and dieticians enabling them to better detect recognise and start treatment of malnutrition in the elderly

Food for Health, Food for Wealth Lynn Harbottle,2004 Food and eating practices are central to current sociological and anthropological concerns about the body health consumption and identity This study explores the importance of these themes as they intersect with processes of globalization and cultural production within a specific group of consumers British Shi'ite Iranians Through the analysis of the consumption practices of this particular migrant group this book illustrates how both the nutritional value and symbolic significance of food contribute to its health giving properties and how gender and ethnic identities are preformed and reinforced through the medium of food work in public and private spheres At the same time as this study demonstrates migration modifies and transfigures such identities and produces hybrid cultures and cuisines

Optimising Sweet Taste in Foods W J Spillane,2006-07-17 A sweet taste is often a critical component in a consumer's sensory evaluation of a food product This important book summarises key research on what determines consumer perceptions of sweet taste the range of sweet tasting compounds and the ways their use in foods can be optimised The first part of the book reviews factors affecting sweet taste perception It includes chapters on how taste cells respond to sweet taste compounds genetic differences in sweet taste perception the influence of taste odour and taste ingredient interactions and ways of measuring consumer perceptions of sweet taste Part two discusses the main types of sweet tasting compounds sucrose polyols low calorie and reduced calorie sweeteners The final part of the book looks at ways of improving the use of sweet tasting compounds including the range of strategies for developing new natural sweeteners improving sweetener taste optimising synergies in sweetener blends and improving the use of bulk sweeteners With its distinguished editor and international team of contributors Optimising sweet taste in foods is a standard reference for the food industry in improving low fat and other foods Investigates what determines consumer perceptions of sweet taste Looks at improving the use of sweet tasting compounds Explores strategies for delivering new natural sweeteners

Food Choice And The Consumer David Marshall,David W. Marshall,1995-12-31 The provision of food for consumers is affected by factors concerned with a variety of disciplines such as technical feasibility choice and environment This book explores these factors

Child Nutrition in South East Asia H.K.A. Visser,J.G. Bindels,2012-12-06 Eighth Nutricia Cow and Gate Symposium

The Psychology of Nutrition David Booth,2016-05-06 This title explores the psychological processes involved in the selection and consumption of foods and drink The exposition is firmly linked to research evidence on the cognitive socio-economic and physiological influences on the desire to eat and drink The basic theory is that appetite is a learned response to a recognized complex of cues from foods the body and the social and physical environment The volume starts with infant care

giver interactions in feeding then moves on to consider how physical and social maturation in Western culture affects attitudes to foods concentrating on the phenomena of ordinary dieting and the extremes of disordered eating The concluding chapters deal with the process within the lives of individual consumers which causes the same eating habits to form in different segments of society It also looks at food technology marketing and governmental regulation The Psychology of Nutrition tackles questions about what goes on in eaters and drinkers minds about the foods and beverages they are consuming and about the cultural meaning of the eating occasion in industrialized cultures

Aware Food Choices: Bridging the Gap Between Consumer Knowledge About Nutritional Requirements and Nutritional Information

Angela Tarabella, Barbara Burchi, 2015-12-11 This Brief provides a snapshot of the continuing debate in the food industry on how to bridge the gap between consumer knowledge of nutrition principles and the nutrition information system currently in place for labelling Aware Food Choices Bridging the Gap Between Consumer Knowledge About Nutrition and Nutritional Information examines the available literature on consumer understanding of nutritional information and comments on the current poor knowledge shown by consumers about nutrition principles Another focus of this Brief is on the evolution of nutritional information in food labelling and current regulations on nutritional claims and product facts In reviewing attempts to improve the nutrition information system this work points out that consumers must first understand the data provided in order to utilize the system to make healthy food choices Therefore any campaigns aimed at improving the information system must concentrate on consumer data understanding of nutrition principles and components as opposed to a sole focus on labelling upgrades
