**Lawyer**, 2005 Reframing Intellectual Property Law in Sri Lanka Althaf Marsoof, Kanchana Kariyawasam, Chamila Talagala, 2022-11-29 This book is a reflection on domestic intellectual property lawmaking from a developing country's perspective It focuses on Sri Lanka a South Asian jurisdiction with a socio economic cultural and political landscape similar to other developing nations in the region but the intellectual property regime of which has been less explored The aim of this book is to address the discrepancies gaps and flaws in the national intellectual property legal framework of Sri Lanka In doing so the book considers Sri Lanka's obligations under TRIPS and other related intellectual property treaties to which the country is a party The book also examines approaches adopted by developing countries in the region and beyond as well as other more developed nations in calibrating Sri Lanka's domestic intellectual property regime to better address the country's domestic needs and national interests The approach adopted in this book is of relevance more generally to policymakers legislators legal academics scholars jurists legal practitioners and judges who are keen on exploring the extent to which domestic intellectual property legislation complies with international intellectual property norms and standards and more importantly the extent to which domestic law makes use of the flexibilities under international law in addressing domestic needs and national interests *Contractual Certainty in International Trade* Volkmar Gessner, 2008-12-19 Global business interacts efficiently despite the heterogeneity of social economic and legal cultures which according to widespread assumptions cause insecurities and uncertainties Breaches of contracts may occur more frequently and business relationships may be terminated more often in international than in domestic trade But most business people engaged in exporting or importing products or services seem to operate in a sufficiently predictable environment allowing successful ventures into the global market The apparent paradox presented by cultural institutional diversity and contractual efficiency in cross border business transactions is the focus of this volume of essays The wide range of approaches adopted by contributors to the volume include the Weberian concept of law as a tool for avoiding the risk of opportunism economic sociology which treats networks and relationships between contractual parties as paramount representatives of new institutional economics who discuss law as well as private governance institutions as most efficient responses to risk

comparative economic sociologists who point to the varieties of legal cultures in the social organisation of trust and national and international institutions such as the World Bank which try to promote legal certainty in the economy The purpose of the volume is to build on this interdisciplinary exercise by adding empirical evidence to ongoing debates regarding enabling structures for international business and by critically reviewing and discussing some of the propositions in the literature which contain interesting hypotheses on the effects of the internationalization of markets on market co ordination institutions and on the role of the state in the globalising economy

*Contract Manufacturing of Medicines* Magdalena Krekora,2008-01-01 Taking advantage of liberal regulations under the current world trade regime that permit the separation of manufacturing from marketing many pharmaceutical companies like other companies outsource the actual manufacture of their products However because the quality of medicines is crucial to public health the pharmaceutical industry is perhaps the most regulated of all industries In most countries medicines are controlled prior to their marketing and their manufacture is carried out under strict supervision Necessarily numerous international initiatives have led to elaboration of standards relating to the manufacture and marketing of medicines These standards impose stringent rules on all parties to pharmaceutical manufacturing contracts This very useful book provides a comprehensive global guide to the legal issues and procedures involved in outsourcing the manufacture of medicines It describes the legal requirements relating to the manufacture and distribution of medicines emphasising the impact of regulatory supervision on the rights and obligations of persons who outsource manufacturing of medicines and on those who provide the manufacturing services The author provides detailed coverage of such pertinent topics as the following and definition of and medicineand in different jurisdictions and categories of medicines and manufacturing and importation regulation in numerous jurisdictions worldwide and inspection regimes and good manufacturing practice GMP and marketing authorization and manufacturing documentation and complaints and product recall and liability insurance and protection of trade secrets and data exclusivity and data protection and deficiencies and delays and and recognition and enforcement of judgements A significant part of the book is devoted to cross border problems arising from such matters as conflict of laws or taxation Indispensable to counsel for pharmaceutical companies of any size *Contract Manufacturing of Medicines* will also be of great value to practitioners and academics concerned with international trade for its precise in depth delineation of the inner workings of a complex and highly significant trade regime
