**The Hands-on Guide for House Officers** Anna Donald, Michael Stein, 1996-01-01 Although this book is aimed primarily at the final year medical student about to begin his/her first house job it will also prove invaluable to house officers already on the job. The book will provide finalists with real openings for action in their work so they can perform with confidence and ease. It aims to bridge the gap between the theoretical knowledge gained at medical school and the practical know-how of being a doctor on a daily basis. Reading this book should ameliorate the feeling of panic that invariably paralyses finalists as they begin their first house jobs.

What They Didn't Teach You at Medical School Alan V. Parbhoo, 2007-05-23 During medical training there are certain tasks that are not taught at medical school nor in the common reference books. There are some skills that medical students are expected to learn by osmosis. These skills are never officially taught or examined in medical school but are however a fundamental part of being a safe, good and efficient doctor. This book includes golden rules or important points to remember and case examples both of which are given as displayed extracts. This book will help the junior doctor unlock their potential and improve their performance, cutting the time it takes to achieve certain medical objectives. It is meant to fill in the gaps where the medical school and clinical guides stop. It gives the reader the information needed to organise themselves so that they can hit the ground running. It is not intended as a clinical survival guide but more a friendly hand to allow the reader to get ahead in medicine and how to keep on track and develop a career path.
