Huber, A.M. Headrick, 1999-04-15 Forensic document examination is the study of physical evidence and physical evidence cannot lie. Only its interpretation can err. Only the failure to find it or to hear its true testimony can deprive it of its value. Roy Huber, author. A definitive review of handwriting identification, this book presents in a general manner how to approach document examination and then in particular how to apply handwriting identification to the document. Types of handwriting are discussed in detail. For the first time in the field of questioned document examination, *Handwriting Identification: Facts and Fundamentals* consolidates the pertinent information from published and unpublished sources respecting writing that is essential to the expansion of a practitioner's general knowledge of handwriting identification and to the proper education of novices. Written in a question and answer format, the book suggests some of the questions that one might ask of an examiner and provides the answers that knowledgeable and competent examiners should be expected to give. This book is a valuable addition to law libraries and to every practicing document examiner as well as every lawyer handling cases in which the authenticity of handwriting might be disputed.
