regional variants This volume asks how when where by whom and for what purposes Greek alphabetic writing developed Anne Jeffery's *Local Scripts of Archaic Greece* 1961 reissued with a valuable supplement in 1990 was an epoch making contribution to the study of these issues But much important new evidence has emerged even since 1987 and debate has continued energetically about all the central issues raised by Jeffery's book the date at which the Phoenician script was taken over and adapted to write vowels with separate signs the priority of Phrygia or Greece in that process the question whether the adaptation happened once and the resulting alphabet then spread outwards or whether similar adaptations occurred independently in several places if the adaptation was a single event the region where it occurred and the explanation for the many divergences in local script what the scripts tell us about the regional divisions of archaic Greece There has also been a flourishing debate about the development and functions of literacy in archaic Greece The contributors to this volume bring a range of perspectives to bear in revisiting Jeffery's legacy including chapters which extend the scope beyond Jeffery by considering the fortunes of the Greek alphabet in Etruria in southern Italy and on coins
