World Literature, Cosmopolitanism, Globality Gesine Müller, Mariano Siskind, 2019-10-21 From today's vantage point it can be denied that the confidence in the abilities of globalism mobility and cosmopolitanism to illuminate cultural signification processes of our time has been severely shaken In the face of this crisis a key concept of this globalizing optimism as World Literature has been for the past twenty years necessarily is in the need of a comprehensive revision World Literature Cosmopolitanism Globality Beyond Against Post Otherwise offers a wide range of contributions approaching the blind spots of the globally oriented Humanities for phenomena that in one way or another have gone beyond the discourses aesthetics and political positions of liberal cosmopolitanism and neoliberal globalization Departing basically but not exclusively from different examples of Latin American literatures and cultures in globalized contexts this volume provides innovative insights into critical readings of World Literature and its related conceptualizations A timely book that embraces highly innovative perspectives it will be a mustread for all scholars involved in the field of the global dimensions of literature

The reactive scattering for H H₂ and H H₂ and its isotopologues were investigated using different methods The studies aimed at providing insights into elementary reactions and go beyond these to more complex chemical reactions By comparison of the reaction probabilities of H H₂ using adiabatic and non adiabatic methods it was found that at low collision energies the reaction preferentially occurs adiabatically but at higher collision energies non adiabatic effects should be taken into account For H H₂ and its isotopologues we can see that at low collision energies the reaction probabilities and reaction cross section using SM PES and AY PES are very similar but different from PS PES The reaction cross sections investigated with quasi classical trajectories are higher than those calculated with quantum wavepackets For the collision H and D with HD the main reaction path ways are different with the different collision energies **Más Allá Del Arco Iris** Guillermo
