Regulae ad directionem ingenii / Rules for the Direction of the Natural Intelligence René Descartes, 2024-01-15 Exactly four hundred years after the birth of René Descartes 1596-1650 the present volume now makes available for the first time in a bilingual philosophical edition prepared especially for English speaking readers his *Regulae ad directionem ingenii* Rules for the Direction of the Natural Intelligence 1619-1628 the Cartesian treatise on method This unique edition contains an improved version of the original Latin text a new English translation intended to be as literal as possible and as liberal as necessary an interpretive essay contextualizing the text historically philologically and philosophically a comprehensive index of Latin terms a key glossary of English equivalents and an extensive bibliography covering all aspects of Descartes methodology Stephen Gaukroger has shown in his authoritative *Descartes An Intellectual Biography* 1995 that one cannot understand Descartes without understanding the early Descartes But one also cannot understand the early Descartes without understanding the *Regulae* Rules Nor can one understand the *Regulae* Rules without understanding a philosophical edition thereof Therein lies the justification for this project The edition is intended not only for students and teachers of philosophy as well as of related disciplines such as literary and cultural criticism but also for anyone interested in seriously reflecting on the nature expression and exercise of human intelligence What is it How does it manifest itself How does it function How can one make the most of what one has of it Is it equally distributed in all human beings What is natural about it and what not In the *Regulae* Rules Descartes tries to provide from a distinctively early modern perspective answers both to these and to many other questions about what he refers to as *ingenium* **Paris Médical**, 1911 Each half year consists of two volumes *Partie médicale* and *Partie paramédicale* , **L'intégrale. a model for methodological renewal The key concepts in his theological approach and his evaluation are anthropology and semiotics These two aspects have left their marks on the organisation of this book which is a selective compilation drawn from his earlier publications This collection consists of nineteen studies which have lost nothing of their topicality and most of which are now being translated into English French or German for the first time By crossing the frontier of language in such a way the editors wish not only to honour a leading specialist in liturgy but also to contribute to academic research into liturgy throughout the world Gerard Lukken 1933 studied at the Diocesan Seminary in Haaren Noord Brabant the Pontificia Università in Rome and the Institut Supérieur de Liturgie in Paris He was professor of liturgy and sacramental theology from 1967 and director of the Liturgical Institute from 1992 at the Theological Faculty of Tilburg until his retirement in 1994
