The End of Meaning Matthew Gumpert, 2012-04-25 The specter of the apocalypse has always been a semiotic fantasy only at the end of all things will their true meaning be revealed Our long romance with catastrophe is inseparable from the Western hermeneutical tradition our search for an elusive truth one that can only be uncovered through the interminable work of interpretation Catastrophe terrifies and tantalizes to the extent it promises an end to this task 9 11 is this book's beginning but not its end Here it seemed was the apocalypse America had long been waiting for until it became just another event And indeed the real lesson of 9 11 may be that catastrophe is the purest form of the event From the poetry of classical Greece to the popular culture of contemporary America *The End of Meaning* seeks to demonstrate that catastrophe precisely as the notion of the sui generis has always been generic This is not a book on the great catastrophes of the West it offers no canon of catastrophe no history of the catastrophic *The End of Meaning* asks instead what if meaning itself is a catastrophe

[...*After the Media*] Siegfried Zielinski, 2015-11-15 The media are now redundant In an overview of developments spanning the past seventy years Siegfried Zielinski's *After the Media* discusses how the means of technology based communication assumed a systemic character and how theory art and criticism were operative in this process Media explicit thinking is contrasted with media implicit thought Points of contact with an arts perspective include a reinterpretation of the artist Nam June Paik and an introduction to the work of Jake and Dinos Chapman The essay ends with two appeals In an outline of a precise philology of exact things Zielinski suggests possibilities of how things could proceed after the media With a vade mecum against psychopathia medialis in the form of a manifesto the book advocates for a distinction to be made between online existence and offline being **Gabriel García Márquez and the Powers of Fiction** Julio Ortega, Claudia Elliott, 1988

Geospatial Challenges in the 21st Century Kostis Koutsopoulos, Rafael de Miguel González, Karl Donert, 2019-01-16 This book focuses on 21st century geospatial technologies GT It highlights their broad range of capabilities and their essential role in effectively addressing and resolving critical everyday issues such as environment sustainability climate change urban planning economy culture and geopolitics Featuring chapters written by leading international scientists it discusses the application of GT tools and demonstrates that the problems requiring such tools transcend national boundaries cultures political systems and scientific backgrounds on a global scale In addition it enhances readers spatial understanding of and geographical reasoning in connection with societal issues The book will appeal to scientists teachers and students of

geography the earth sciences and related areas as well as decision makers interested in the application and capabilities of geospatial technologies and new spatial methods for addressing important issues **The Written World** Jeffrey N.

Peters,2018-05-15 In *The Written World Space Literature and the Chorological Imagination in Early Modern France* Jeffrey N Peters argues that geographic space may be understood as a foundational originating principle of literary creation By way of an innovative reading of chora a concept developed by Plato in the *Timaeus* and often construed by philosophical tradition as space Peters shows that canonical literary works of the French seventeenth century are guided by what he calls a chorological approach to artistic invention The chorological imagination describes the poetic as a cosmological event that gives location to or more accurately in Plato s terms receives the world as an object of thought In analyses of well known authors such as Corneille Moli re Racine and Madame de Lafayette Peters demonstrates that the apparent absence of physical space in seventeenth century literary depiction indicates a subtle engagement with rather than a rejection of evolving principles of cosmological understanding Space is not absent in these works so much as transformed in keeping with contemporaneous developments in early modern natural philosophy *The Written World* will appeal to philosophers of literature and literary theorists as well as scholars of early modern Europe and historians of science and geography

Sciences have a leading role to play alongside others in designing supporting and implementing these digital transformation projects Their ambition is to participate in the development of innovative and empowering devices that is to say systems that are truly at the service of human beings and their activity that empower these professionals to take action and that also provide occupational health services This book takes a multidisciplinary look at the challenges of these digital transformations making use of occupational psychology ergonomics sociology of uses and management sciences This viewpoint also helps provide epistemological methodological and empirical insights to better understand and support the changes at work

Poetry as Re-Reading Ming-Qian Ma, 2008-08-20 Grounded in a detailed and compelling account of the philosophy guiding such a project Ma's book traces a continuity of thought and practice through the very different poetic work of objectivists Louis Zukofsky George Oppen Carl Rakosi and John Cage and language poets Susan Howe Lyn Hejinian Bruce Andrews and Charles Bernstein His deft individual readings provide an opening into this notoriously difficult work even as his larger critique reveals a new and clarifying perspective on American modernist and post modernist avant garde poetics Ma shows how we cannot understand these poets according to the usual way of reading but must see how they deliberately use redundancy unpredictability and irrationality to undermine the meaning oriented foundations of American modernism and to force a new and different kind of reading Pub desc [Arts & Humanities Citation Index](#), 1997 [The Silver Age of Comic Book Art](#) Arlen Schumer, 2003 Details the achievements of an array of comics creators and the characters they created during the 1960s [Fifty Key Contemporary Thinkers](#) John Lechte, 2006-08-21 Fifty Key Contemporary Thinkers surveys the most important figures who have influenced post war thought The reader is guided through structuralism semiotics post Marxism and Annales history on to modernity and postmodernity With its comprehensive biographical and bibliographical information this book provides a vital reference work of the last fifty years **The Mestizo as Crucible** Christine De Lailhacar, 1996 American Indian and African Poets of Mixed Origin as Possibility of Comparative Poetics **Rabelais: Pantagruel, book 4-5** François Rabelais, 1893 [Hermes--literature, Science, Philosophy](#) Michel Serres, 1982 *Control of Synchronous Motors* Jean-Paul Louis, 2013-02-07 Synchronous motors are indubitably the most effective device to drive industrial production systems and robots with precision and rapidity Their control law is thus critical for combining at the same time high productivity to reduced energy consummation As far as possible the control algorithms must exploit the properties of these actuators Therefore this work draws on well adapted models resulting from the Park's transformation for both the most traditional machines with sinusoidal field distribution and for machines with non sinusoidal field distribution which are more and more used in industry Both conventional control strategies like vector control either in the synchronous reference frame or in the rotor frame and advanced control theories like direct control and predictive control are thoroughly presented In this context a significant place is reserved to sensorless control which is an important and critical issue in tomorrow's motors
