Hoecker-Drysdale, 2014-05-01 The Essays in this volume explore the work of Harriet Martineau from a sociological perspective highlighting her theoretical contributions in the areas of the sociology of labor gender and political economy The contributors each offer a contextual theoretical and methodological assessment of her work beginning with the opportunities and challenges of utilizing Martineau pedagogically in the sociology classroom **Handbook of the Sociology of Morality**

Steven Hitlin, Stephen Vaisey, 2010-10-17 Human beings necessarily understand their social worlds in moral terms orienting their lives relationships and activities around socially produced notions of right and wrong Morality is sociologically understood as more than simply helping or harming others it encompasses any way that individuals form understandings of what behaviors are better than others what goals are most laudable and what proper people believe feel and do Morality involves the explicit and implicit sets of rules and shared understandings that keep human social groups intact Morality includes both the shoulds and should nots of human activity its proactive and inhibitive elements At one time sociologists were centrally concerned with morality issues like social cohesion values the goals and norms that structure society and the ways individuals get socialized to reproduce those concerns In the last half century however explicit interest in these topics has waned and modern sociology has become uninterested in these matters and morality has become marginalized within the discipline But a resurgence in the topic is happening in related disciplines psychology neurology philosophy and anthropology and in the wider national discourse Sociology has much to offer but is not fully engaged in this conversation Many scholars work on areas that would fall under the umbrella of a sociology of morality but do not self identify in such a manner nor orient their efforts toward conceptualizing what we know and should know along these dimensions The Handbook of the Sociology of Morality fills a niche within sociology making explicit the shared concerns of scholars across the disciplines as they relate to an often overlooked dimension of human social life It is unique in social science as it would be the first systematic compilation of the wider social structural cultural cross national organizational and interactional dimension of human moral understood broadly thought feeling and behavior **Ethnographic Ways of Knowing** Lucinda

Carspecken, 2024-06-14 Drawing on the works of ten scholars and public intellectuals ranging over 200 years this book foregrounds ways of knowing that include but go beyond the cognitive The book explores the work of Harriet Martineau Jane Addams W E B Du Bois Zora Neale Hurston Ella Deloria M N Srinivas Barbara Myerhoff Orlando Fals Borda Ronald Takaki and Nawal El Saadawi The author discusses their multifaceted ethnographic practices and argues that such practices are still

under acknowledged in contemporary research in comparison to cognition and categorization These scholars were outsiders to their societies in a variety of ways They highlighted power imbalances in the perception and representation of one group by another and brought direct experience emotion narrative imagination recognition self reflection activism and cultural humility into their writing in addition to rationality The book engages with the authors and their ideas in the context of their times and places It also reclaims them as methodological predecessors noting their contributions to what educational ethnography has been and what it could be in the future Expanding the canon of social research history and providing insight into unique methodological forms this text will be valuable for scholars and postgraduate students with interests in ethnography as well as the history of research anthropology and qualitative methods more broadly A Writing Halfway Between Theory and Fiction Miriam Wallraven, 2007 This book is focused on the surprisingly large number of feminist women writers in literary history who use different genres for their feminist ideas while subverting or transgressing established boundaries between fictional and theoretical writing In particular texts by such diverse authors as Mary Wollstonecraft Mary Hays Mary Robinson Harriet Martineau Olive Schreiner Virginia Woolf the French Feminists Hélène Cixous and Monique Wittig Margaret Cavendish and Michelle Roberts are analysed This chronological in depth reading of feminist texts is based on the interrelation of content genre and discourse The study provides the first analysis of the phenomenon of the gendering of genre and feminists troubled involvement in theory as well as literature In this way key questions concerning the emergence of feminism during the last four hundred years are presented in a new and revealing light e g for what reason did Mary Wollstonecraft not only write her famous feminist treatise A Vindication of the Rights of Woman but also a novel in which she tests the arguments of her theoretical treatise by means of fiction What is the significance of Virginia Woolf's Novel Essay The Pargiters which seeks to connect theoretical and fictional parts by juxtaposing them How can the mixture of genres be interpreted which Catherine Clement attributes to the texts of Hélène Cixous as a writing halfway between theory and fiction
