How To Recycle A Disposable Planet:

How to Recycle a Disposable Planet Tommie L. Clendening, 2003-09 Elevations is not just an ordinary book of poetry but an etheric book of psalms which loosens the fabric of corporality AGLA is an acronym which asserts the power of Adonai The Higher Self in man and humanity Ateh Geburah Le Ollahm Adonai ON is ancient Egyptian referring to the Power On High God or the Sun giving life to everything below which corresponds to the human will situated in the heart As one reads the text a gentle powerful yet playful unfolding occurs revealing the true nature of the Oneness of All That Is within humanity It is this universal truth of life that the author wishes to share so that with the unfolding of many individuals we may return to the garden

HowExpert Guide to Recycling HowExpert, Jen Thilman, 2023-01-03 If you want to learn how to recycle eliminate disposables reduce waste pollution conserve resources save energy and protect the environment then check out HowExpert Guide to Recycling Have you ever been gaslighted You know grossly misled to believe something for the benefit of someone else Unfortunately we've all been victims of this for decades by big corporations especially the oil industry They have spent billions to convince us that climate change is our fault That if we dispose of our trash the right way and lower our carbon footprint we wouldn't have the environmental problems we are now facing Nothing could be further from the truth This guide will show how we've been misled to believe this narrative in order to protect corporate profits and how changing our disposable habits and fighting misinformation is the best thing we can do to beat climate change Corporations have lied to keep us buying their products and distracted from the fact that waste and emissions are caused by how they do business Single use plastics are a big money maker for the fossil fuel industry They created the triangle symbol to make us think plastics will recycle even though that can't easily be done Manufacturers choose not to invest in recycled packaging and materials Virgin materials mined from Earth are cheaper and often subsidized Technology exists to eliminate most of the greenhouse gas emissions they cause It's time to fight for the truth and take matters into our own hands What we buy and how it's made affects how well reduce reuse and recycle works Using the power of our voices and wallets we can make corporations change how they do business They answer to us the people who buy their products and invest in their stock We can insist they take responsibility for the damage they cause We have the power to fight climate change at home and in our cities I don't know about you but I'm not ready to leave the health and well being of my family in the hands of people who I hope will figure this mess out We all need to change for the better of our planet and our lives There are alternatives to buying disposable goods and packaging Buy durable goods and reusable packaging to save money and the planet Reduce and reuse packaging First eliminate plastic shopping bags We can do things differently to change our eating and buying habits A lot of trash comes with convenience dining like packaged and fast foods Buying used products reduces wasted energy materials and water It's time we use our buying power and our votes to change for the better Waste of anything food energy goods needs to be eliminated Elect representatives who put people before corporations Your voice can create change Check

Reduce, Reuse, Reimagine Beth Porter, 2018-11-15 Ecosystems require balance to survive and when that balance is compromised disaster can befall the whole system To keep a balance in our global ecosystem we need to use resources efficiently equitably and sustainably In both nature and economics we observe that when a healthy distribution of resources is achieved systems can not only function but flourish The United States recycles roughly 34% of its waste and has been stuck at this level for decades Recycling brings a balance to our system by managing resources in a loop When done well it benefits communities and the environment Individuals are a key part of connecting this loop because we provide a supply of materials and a demand for new recycled products But many of us don't know what happens after those items leave our homes We're confused by inconsistent rules of what we can and can't recycle Our confusion has huge consequences and is a reason why our recycling is stuck Throughout Reduce Reuse Reimagine Beth Porter provides answers to clear up that confusion and shares great resources about recycling explaining the complexity guiding individual action and contextualizing its history This book reveals how we arrived at this state of dysfunction and what steps we need to employ to be an active participant in strengthening our recycling system Nature knows how to recycle itself decomposing waste back into the soil to continue the circle of growth We should follow its lead

My Heresies Michael Jean Nystrom-Schut, 2016-06-25 In the mind of each person on the planet a set of notions and ideas of God or gods reside Some of these systems are basic and simple Others are highly complex and complicated Some borrow their God/god notions from authority or from others they know Others are much more original eclectically piecing together many separate parts from multiple sources No two people in the world experience and translate God/gods in the same way And this is what makes things so interesting As I have encountered this wonderful life I have also bumped up against countless people who were in the position to explain exactly who God was and was not They were quite sure of themselves and anxious to impart this wisdom to me But because I had a mind and heart of my own this put me on the outside looking in for much of my life We all come to a place where we realize we must make our minds up as to what we will and will not do how we will think and who we will be As I have encountered them and their God/gods I have found my own way through this foggy maze and discovered a modicum of peace and reconciliation in the process This is the massive task of all of us as well as why I needed to lay it out to you in this lengthy 2 part book

New Concepts for Business and Humanity Mia den Haan, 2007-10-29 This book emphasizes that by the year 2009 the impact of climate change will be noticed by all and that a possible global crisis may develop perhaps no later than 2025 It explains that since global warming is man made

humanity has no choice but to adjust its lifestyle reduce its ecological footprint and also restore the ecology in order to avoid possible catastrophic climate change Companies will have to play an important role in resolving this situation and may need to review their direction if need be companies may have to take the lead and act without the support of their respective governments While organizations may in some cases already have taken a leading role there is not yet sufficient action taking place to combat climate change While the information in this book contains a brief overview of the possible events for the next twenty years it also holds the key which is needed to change human consciousness directly addressing the main aspects of human consciousness that are the cause of many planetary imbalances The author decided to publish this material which she received late 2004 because of a looming planetary crisis Some of the timelines predicted in the book are now beginning to emerge Many organizations can play a major role in making changes to support the environment and can in the end perhaps more so than governments create the solution to an enormous global problem Those in leading positions can be a step ahead It may be in their interest to do so to be competitive as part of a new ecologically more aware future There is a trend in business whereby people are proactively looking for solutions while there may be technical solutions available for some aspects of this emerging crisis innovation is required to implement solutions back into the production process and into society Within each person already resides a unique very creative and innovative part that may be of assistance Each person has access to this innovative part within which has answers and solutions to any situation in life This innate part is often able to express itself in people with very good creative ability or people with a special gift and is available to everyone who wishes to find it In this book an example is shown of how this creative and innovative part could become a resource for business This part is sometimes called the true self your authenticity or your own innate uniqueness For those who wish to explore this part a method which is briefly outlined in this book may be beneficial This unique method called exchange of awareness utilizes the persons self through a process that may be of assistance It includes an example of how to apply this method in personal relationships and in the workplace environment such as when staff members are not in alignment with a companys general objectives The true self or innate uniqueness knows what is required in any situation and may be of help by providing further insights More care and caring procedures are needed to be applied by humanity The book provides examples of care or lack thereof in the context of both business and personal relationships It shows where care is often lacking in a business process such as sales It includes some sample conceptual ideas about implementation of care These care concepts which are a major issue are often absent in todays society and need to be implemented in any organizational structure such as a business hospital or educational facility to improve functionality and outflow Through implementation of care principles there may be an improvement in the outflow of people and the structures they take part in with benefits for all of life and society at large

Go Golden Dillon Naber Cruz, 2018-12-13 Symptoms of broken systems are all around us due to our over consumptive lifestyles nearly unfettered capitalism failure to live peaceably together and the societal dismissal of nature s
