Environmental Law and Governance in the Pacific Margaretha Wewerinke-Singh, Evan Hamman, 2020-08-26 This volume examines environmental law and governance in the Pacific focusing on the emerging challenges this region faces. The Pacific is home to some of the world's most astonishing biological and cultural diversity. At the same time, Pacific Island nations are economically and technically under-resourced in the face of tremendous environmental challenges. Destructive weather events, ocean acidification, mining, logging, overfishing, and pollution increasingly degrade ecosystems and affect fishing, farming, and other cultural practices of Pacific Islanders. Accordingly, there is an urgent need to understand and analyse the role of law and governance in responding to these pressures in the Pacific. Drawing on academic and practitioner expertise from the Pacific region as well as Europe and the United States, this unique collection navigates the major environmental law and governance challenges of the present and future of the Pacific. *Environmental Law and Governance in the Pacific* discusses 21 Pacific Island countries and territories including Cook Islands, Fiji, Papua New Guinea, Solomon Islands, Vanuatu, and Samoa, and a broad range of themes such as deep sea mining, wetlands, and mangroves, heritage, endangered species, human rights, and access to justice, are addressed, thus providing a comprehensive and state-of-the-art overview of environmental law and governance within specific jurisdictions as well as across the Pacific region as a whole. This volume will be essential reading for students and scholars interested in environmental law and governance in the Pacific region as well as policy makers, practitioners, and NGOs involved in the development and implementation of environmental law and policy.

Land Tenure Center Newsletter University of Wisconsin--Madison. Land Tenure Center, 1976 **The Pacific Islands** Moshe Rapaport, 2013-05-31 The Pacific is the last major world region to be discovered by humans. Although small in total land area, its numerous islands and archipelagoes, with their startlingly diverse habitats and biotas, extend across a third of the globe. This revised edition of a popular text explores the diverse landforms, climates, and ecosystems of the Pacific island region. Multiple chapters, written by leading specialists, cover the environment, history, culture, population, and economy. The work includes new or completely revised chapters on gender, music, logging, development, education, urbanization, health, ocean resources, and tourism. Throughout, two key issues are addressed: the exceptional environmental challenges and the demographic, economic, and political challenges facing the region. Although modern technology and media, and waves of continental tourists, are fast eroding island cultures, the continuing resilience of Pacific island populations is apparent. This is the only contemporary text on the Pacific Islands that covers both environment and sociocultural issues and will thus be indispensable for any serious student of the region. Unlike other reviews, it treats the entirety of Oceania, with the exception of Australia, and is well illustrated with numerous photos and maps, including a regional atlas. Contributors: David

Pacific Stuart Banner,2009-06-30 During the nineteenth century British and American settlers acquired a vast amount of land from indigenous people throughout the Pacific but in no two places did they acquire it the same way Stuart Banner tells the story of colonial settlement in Australia New Zealand Fiji Tonga Hawaii California Oregon Washington British Columbia and Alaska Today indigenous people own much more land in some of these places than in others And certain indigenous peoples benefit from treaty rights while others do not These variations are traceable to choices made more than a century ago choices about whether indigenous people were the owners of their land and how that land was to be transferred to whites Banner argues that these differences were not due to any deliberate land policy created in London or Washington Rather the decisions were made locally by settlers and colonial officials and were based on factors peculiar to each colony such as whether the local indigenous people were agriculturalists and what level of political organization they had attained These differences loom very large now perhaps even larger than they did in the nineteenth century because they continue to influence the course of litigation and political struggle between indigenous people and whites over claims to land and other resources Possessing the Pacific is an original and broadly conceived study of how colonial struggles over land still shape the relations between whites and indigenous people throughout much of the world **Kinship and Marriage in a New**

Guinea Village H. Ian Hogbin,2021-01-07 The economic and political systems legal code and religious beliefs of the people of the New Guinea village of Busama were analysed by H Ian Hogbin in his earlier work Transformation Scene 1951 In this new study founded on field work carried out at intervals over a seven year period he is concerned primarily with the individual in his relations with the kinship structure He takes a typical Busama through a full span of life from birth through infancy childhood adolescence and marriage to maturity and death and he shows how each stage in the individual s life involves a change in his kinship relationships and responsibilities This approach gives the professional anthropologist a set of carefully presented data analysed in line with the contemporary emphasis on seeing the relations between kin in the context of the local community and it also offers the general reader an enjoyable and authentic account of the intimacies of Melanesian life
