Raynor,2007-02-20 A compelling vision Bold leadership Decisive action Unfortunately these prerequisites of success are almost always the ingredients of failure too In fact most managers seeking to maximize their chances for glory are often unwittingly setting themselves up for ruin The sad truth is that most companies have left their futures almost entirely to chance and don t even realize it The reason Managers feel they must make choices with far reaching consequences today but must base those choices on assumptions about a future they cannot predict It is this collision between commitment and uncertainty that creates THE STRATEGY PARADOX This paradox sets up a ubiquitous but little understood tradeoff Because managers feel they must base their strategies on assumptions about an unknown future the more ambitious of them hope their guesses will be right or that they can somehow adapt to the turbulence that will arise In fact only a small number of lucky daredevils prosper while many more unfortunate but no less capable managers find themselves at the helms of sinking ships Realizing this even if only intuitively most managers shy away from the bold commitments that success seems to demand choosing instead timid unremarkable strategies sacrificing any chance at greatness for a better chance at mere survival Michael E Raynor coauthor of the bestselling *The Innovator s Solution* explains how leaders can break this tradeoff and achieve results historically reserved for the fortunate few even as they reduce the risks they must accept in the pursuit of success In the cutthroat world of competitive strategy this is as close as you can come to getting something for nothing Drawing on leading edge scholarship and extensive original research Raynor s revolutionary principle of Requisite Uncertainty yields a clutch of critical counter intuitive findings Among them The Board should not evaluate the CEO based on the company s performance but instead on the firm s strategic risk profile The CEO should not drive results but manage uncertainty Business unit leaders should not focus on execution but on making strategic choices Line managers should not worry about strategic risk but devote themselves to delivering on commitments With detailed case studies of success and failure at Sony Microsoft Vivendi Universal Johnson Johnson AT T and other major companies in industries from financial services to energy Raynor presents a concrete framework for strategic action that allows companies to seize today s opportunities while simultaneously preparing for tomorrow s promise *Driving Forces in Physical, Biological and Socio-economic Phenomena* Bertrand M. Roehner,2007-05-31 This book was first published in 2007 In recent years network science has become a dynamic and promising discipline here it is extended to explore social and historical phenomena While we experience social interactions every day there is little quantitative knowledge on them

Instead we are often tempted to resort to fanciful explanations to explain social trends Exogenous and endogenous interactions are often the key to understanding social phenomena and unravelling historical mysteries This book begins by explaining how it is possible to bridge the gap between physics and sociology by exploring how network theory can apply to both It then examines the macro and micro interactions in societies The chapters are largely self contained allowing readers easily to access and understand the sections of most interest This multi disciplinary book will be fascinating to all physicists who have an interest in the human sciences and it will provide an alternative perspective to graduate students and researchers in sociology and econophysics

*Selling Happiness* Ellen Johnston Laing, 2004-08-31 From the early twentieth century until the Communist takeover in 1949 Shanghai commercial artists created thousands of colorful posters and black and white advertisements that formed an essential part of modern life in the city This visually appealing and richly illustrated work describes the origin and evolution of modern commercial art in China focusing on colorful advertisement calendar posters that featured distinctive feminine images It makes clear how essential commercial art and its institutional backing were to the development of modern art and even modern society in China over the past century *Selling Happiness* discusses not only advertising art but also the production and marketing of the calendar poster These posters like other advertisements were rendered in a Western realistic technique and were wildly and widely popular Ordinary people throughout China often acquired them to decorate their homes Laing outlines how the Chinese commercial artist who rarely attended formal Western art classes gained skills in Western representational art In the final chapter of the book she explains how the styles developed by the commercial poster artists during the 1920s and 1930s became the basis for certain types of propaganda art under the Chinese Communists in the 1950s and 1960s

**The Etruscan World** Jean MacIntosh Turfa, 2014-11-13 The Etruscans can be shown to have made significant and in some cases perhaps the first technical advances in the central and northern Mediterranean To the Etruscan people we can attribute such developments as the tie beam truss in large wooden structures surveying and engineering drainage and water tunnels the development of the foresail for fast long distance sailing vessels fine techniques of metal production and other pyrotechnology post mortem C sections in medicine and more In art many technical and iconographic developments although they certainly happened first in Greece or the Near East are first seen in extant Etruscan works preserved in the lavish tombs and goods of Etruscan aristocrats These include early portraiture the first full length painted portrait the first perspective view of a human figure in monumental art specialized techniques of bronze casting and reduction fired pottery the bucchero phenomenon Etruscan contacts through trade treaty and intermarriage linked their culture with Sardinia Corsica and Sicily with the Italic tribes of the peninsula and with the Near Eastern kingdoms Greece and the Greek colonial world Iberia Gaul and the Punic network of North Africa and influenced the cultures of northern Europe In the past fifteen years striking advances have been made in scholarship and research techniques for Etruscan Studies Archaeological and scientific discoveries have changed our picture of the Etruscans

**Fundamental Processes in Ecology** David M Wilkinson,2007-09-13 Fundamental Processes in Ecology presents a way to study ecosystems that is not yet available in ecology textbooks but is resonant with current thinking in the emerging fields of geobiology and Earth System Science It provides an alternative process based classification of ecology and proposes a truly planetary view of ecological science To achieve this it asks and endeavours to answer the question what are the fundamental ecological processes which would be found on any planet with Earth like carbon based life The author demonstrates how the idea of fundamental ecological processes can be developed at the systems level specifically their involvement in control and feedback mechanisms This approach allows us to reconsider basic ecological ideas such as energy flow guilds trade offs carbon cycling and photosynthesis and to put these in a global context In doing so the book puts a much stronger emphasis on microorganisms than has traditionally been the case The integration of Earth System Science with ecology is vitally important if ecological science is to successfully contribute to the massive problems and future challenges associated with global change Although the approach is heavily influenced by Lovelock s Gaia hypothesis this is not a popular science book about Gaian theory Instead it is written as an accessible text for graduate student seminar courses and researchers in the fields of ecology earth system science evolutionary biology palaeontology history of life astrobiology geology and physical geography     *The Blackwell Companion to the Economics of Housing* Susan J. tradition interprets religious norms so that they ultimately pass the moral test This mainstream voice is anchored in the meaning of Jewish law which is founded on human autonomy and rationality and in the relationship with God that is assumed in this tradition      Chase's Calendar of Events 2016 Editors of Chase's,2015-09-11 Chase s Calendar of Events is the most comprehensive and authoritative reference available on special events holidays federal and state observances historic anniversaries astronomical phenomena and more Published since 1957 Chase s is the only guide to special days weeks and months
