Ursula K. Le Guin, The Narrow Way Samael Aun Weor, 2025-01-01 Even though we believe we are an advanced civilization the problems that afflict us are undeniable and seem to be getting worse by the day proliferation of nuclear weapons deforestation unceasing wars political instability economic hardship pollution social injustice climate change terrorism etc In spite of humanity's love for the theory of evolution and the cherished belief that we are evolving towards perfection the facts prove otherwise everywhere we look modern society displays clear signs of devolution widespread and systemic degeneration decay and decline towards destruction Jesus the founder of Christianity said wide is the gate and broad is the way that leadeth to destruction the second death and many there be which go in thereat because strait is the gate and narrow is the way which leadeth unto life the second birth and few there be that find it Matthew 7 13 14 In The Narrow Way Samael Aun Weor reveals the secret teachings of Jesus that few have known the way to life is within the marvelous human machine our physical body By harnessing the power of the sexual glands we can revolt against the current towards destruction This revolution cannot be done through belief but through action through a method known since antiquity but kept secret until now sexual transmutation also called alchemy or tantra The way to life is always sexual whether creating physical life or spiritual life That is why throughout the ancient scriptures there are clues towards the preservation of the sexual energy the living waters and why the elite of every religion preserved their sexual energy they knew how to harness it for purposes higher than mere lust The sexual energy is a tremendous power it creates life When harnessed and made pure a process called white tantra it creates life in the superior levels of nature so that one is born again The second birth is the result of creating the solar bodies Astral Body Mental Body Causal Body which Jesus called the wedding garment With the solar bodies one is awakened in the superior dimensions of nature The Narrow Way exposes the ancient secret path hidden in all religions and the source of power that gave birth to the most remarkable souls in history those radiant men and women of terrific compassion and intelligence who embodied the best of what it is to be human The power to become like them is within you too *Experimental* Natalia Cecire, 2019-12-30 A compelling revision of the history of experimental writing from Pound and Stein to Language poetry disclosing its uses and its limits In this bold new study of twentieth century American writing and poetics Natalia Cecire argues that experimental writing should be understood as a historical phenomenon before it is understood as a set of formal phenomena This seems counterintuitive because at its most basic level experimental writing can be thought of as writing which breaks from established forms Touching on figures who are not typically considered experimental such as Stephen Crane Jacob Riis Busby Berkeley Ursula K Le Guin and Gottlob Frege *Experimental* offers a fresh look at authors who are often treated as constituting a center or an origin point of an experimental literary tradition in the United States including Gertrude Stein Ezra Pound William Carlos Williams and Marianne Moore In responding to a crisis of legitimization in the production of knowledge this tradition borrows and

transforms the language of the sciences Drawing upon terminology from the history of science Cecire invokes the epistemic virtue which tethers ethical values to the production of knowledge in order to organize diverse turn of the century knowledge practices feeding into experimental writing Using these epistemic virtues as a structuring concept for the book s argument Cecire demonstrates that experimental writing as we now understand it does not do experiments as in follow a method but rather performs epistemic virtues Experimental texts embody the epistemic virtues of flash objectivity precision and contact associated respectively with population sciences neuroanatomy natural history and toolmaking and anthropology Yet which virtues take precedence may vary widely as may the literary forms through which they manifest Bringing it up to the 1980s Cecire reveals the American experimental literary tradition as a concerted and largely successful rewriting of twentieth century literary history She shows how the Language poets a group of primarily white experimental writers restored to the canon what they saw as modernism s true legacy whose stakes were simultaneously political and epistemological it produced a poet who was an intellectual and a text that was experimental
