## Legacy Of Gemini:

**Geminifocus** Gemini Observatory, 2009-06      *Proceedings* Charles H. Roadman, Hubertus Strughold, Roland Burnell Mitchell, 1968      **The Comet's Legacy: A Tale of Aviation and Innovation** Pasquale De Marco, The DH 106 Comet was the world's first commercial jet airliner. It was a revolutionary aircraft that changed the way people traveled and helped to usher in the jet age. The Comet was developed by de Havilland, a British aircraft manufacturer, in the late 1940s. The aircraft was designed to be a fast, efficient, and comfortable way to travel. It had a sleek, streamlined design and was powered by four de Havilland Ghost turbojet engines. The Comet was also one of the first aircraft to be pressurized, which allowed passengers to fly at higher altitudes without experiencing discomfort. The Comet made its maiden flight in 1949 and quickly entered commercial service. It was an instant success, and airlines around the world began to order the aircraft. The Comet was used to fly passengers on routes across Europe, the Middle East, and Africa. It was also used by the Royal Air Force for military transport. However, the Comet's success was short-lived. In 1954, two Comets crashed within a few months of each other. The cause of the crashes was eventually traced to a design flaw in the aircraft's wings. The Comet was grounded while the problem was fixed, but it never regained its former popularity. Despite its tragic end, the Comet left a lasting legacy on aviation. It was the first commercial jet airliner and helped to usher in the jet age. The Comet also showed the world the potential of jet aircraft and inspired other manufacturers to develop their own jet airliners. Today, the Comet is remembered as a pioneering aircraft that helped to shape the future of aviation. It is a testament to the human spirit of innovation and the desire to explore the skies. The Apollo space program is the most famous and celebrated in American history, but the first successful landing of men on the moon during Apollo 11 had complicated roots dating back over a decade and it also involved one of NASA's most infamous tragedies. Landing on the moon presented an ideal goal all on its own, but the government's urgency in designing the Apollo program was actually brought about by the Soviet Union, which spent much of the 1950s leaving the United States in its dust and rocket fuel. In 1957, at a time when people were concerned about communism and nuclear war, many Americans were dismayed by news that the Soviet Union was successfully launching satellites into orbit. Apollo 11, as well as some predecessor missions, as only faked. Overview of the first steps of spaceflight and the preparatory missions for Apollo already here he discovers more pretense than reality. Detailed description of the Apollo 11 mission on the basis of the NASA documentation, including the evidence that shows the staging of this mission. Overview of crewed space flight after Apollo 11.
