contributed to the enormous technological development which occurred in the railway industry between 1830 and 1923 but working alongside the engineers were the chemists and in certain critical areas their contribution to this development was vital It is a contribution which up until now has not been adequately recognised and this book puts the record straight The book has an unusually wide appeal being of interest to practising chemists those interested in the history of chemistry and its role in society historians of science and technology mechanical engineers and not least railway enthusiasts and railway historians The chemist will be justly proud of the extreme importance of the subject for industry and the railway enthusiast will gain a wholly new picture of the development of the industry in Britain *Haunted Providence* Rory Raven,2008-03-14
