Canons in an Age of Contestation , 2024-06-26 Comparative constitutionalism emerged in its current form against the backdrop of the fall of the Berlin Wall and the end of the Cold War As that backdrop recedes into the past it is being replaced by a more multi polar and confusing world and the current state of the discipline of comparative constitutionalism reflects this fragmentation and uncertainty This has opened up space for new more varied and increasingly critical voices seeking to improve the project of democratic constitutionalism But it also raises questions What of the past if anything is worth preserving Which more recent parts should be defining of the field In this context this book asks which are or should be the canonical texts of comparative constitutionalism The theoretical scope of the contributions is broad and ambitious selecting primary material from beyond the existing textbooks to engage the concept of a canon This framework provides significant insights about inclusion and exclusion and proposes candidates for canonical and anti canonical materials The result is a wide ranging discussion among many voices of how particular judgments and other primary texts have shaped or should

shape our understanding of central elements of democratic constitutionalism from a comparative law perspective This book is not a prescription of one universal understanding but a broader conversation about the field and the future of constitutional democracy
