introdutorios Dos de ellos de tipo más general resultan indispensables para captar el sentido de las concepciones que se exponen en el núcleo del libro y se refieren al nuevo constitucionalismo la estructura del ordenamiento y la teoría de los principios generales del derecho En un capítulo más específico hemos creído conveniente continuar de alguna manera la tarea que emprendió en su momento nuestro inolvidable maestro Jorge Tristram BOSCH actualizando la teoría de la separación de los poderes a la luz de las transformaciones Por último el cuadro de los grandes principios de derecho público hubiera quedado incompleto si no hubiéramos agregado un capítulo con los principios institucionales y sectoriales de aplicación en el derecho administrativo los que guardan estrecha conexión con los principios fundamentales que presiden el sistema constitucional Y aunque somos conscientes de que se trata de un abordaje selectivo y por tanto no del todo completo procuramos trazar una orientación metodológica susceptible de seguirse en ulteriores investigaciones Juan Carlos Cassagne

contraderechos la política sobre los derechos imposibles el olvido de alguno de ellos incluso en la jurisdicción internacional o la exportación de los mismos desde constituciones modélicas a otros paisajes normativos son cuestiones igualmente inquietantes y provocativas La última parte enfoca la posición de la Constitución ante el fenómeno de la jurisdicción supranacional En particular su actitud ante la exigente doctrina del control de convencionalidad factor revulsivo que puede llegar a cambiar la fisonomía de la otrora Ley suprema es decir su transfiguración de constitución nacional a constitución convencionalizada El libro no es solamente descriptivo sino crítico abordando hipótesis extremas como los bordes del control de convencionalidad y sus dificultades operativas
