Counter-Terrorism, Ethics and Technology Adam Henschke, Alastair Reed, Scott Robbins, Seumas Miller, 2021-12-14 This open access book brings together a range of contributions that seek to explore the ethical issues arising from the overlap between counter terrorism ethics and technologies Terrorism and our responses pose some of the most significant ethical challenges to states and people At the same time we are becoming increasingly aware of the ethical implications of new and emerging technologies Whether it is the use of remote weapons like drones as part of counter terrorism strategies the application of surveillance technologies to monitor and respond to terrorist activities or counterintelligence agencies use of machine learning to detect suspicious behavior and hacking computers to gain access to encrypted data technologies play a significant role in modern counter terrorism However each of these technologies carries with them a range of ethical issues and challenges How we use these technologies and the policies that govern them have broader impact beyond just the identification and response to terrorist activities As we are seeing with China the need to respond to domestic terrorism is one of the justifications for their rollout of the social credit system Counter terrorism technologies can easily succumb to mission creep where a technology s exceptional application becomes normalized and rolled out to society more generally This collection is not just timely but an important contribution to understand the ethics of counter terrorism and technology and has far wider implications for societies and nations around the world

Privacy on the Ground Kenneth A. Bamberger,Deirdre K. Mulligan,2024-05-28 An examination of corporate privacy management in the United States Germany Spain France and the United Kingdom identifying international best practices and making policy recommendations Barely a week goes by without a new privacy revelation or scandal Whether by hackers or spy agencies or social networks violations of our personal information have shaken entire industries corroded relations among nations and bred distrust between democratic governments and their citizens Polls reflect this concern and show majorities for more broader and stricter regulation to put more laws on the books But there was scant evidence of how well tighter regulation actually worked on the ground in changing corporate or government behavior until now This intensive five

nation study goes inside corporations to examine how the people charged with protecting privacy actually do their work and what kinds of regulation effectively shape their behavior And the research yields a surprising result The countries with more ambiguous regulation Germany and the United States had the strongest corporate privacy management practices despite very different cultural and legal environments The more rule bound countries like France and Spain trended instead toward compliance processes not embedded privacy practices At a crucial time when Big Data and the Internet of Things are snowballing Privacy on the Ground helpfully searches out the best practices by corporations provides guidance to policymakers and offers important lessons for everyone concerned with privacy now and in the future **Global Privacy**

Transparency and Proportionality in the Schengen Information System and Border Control Co-operation Stephen Karanja, 2008-01-31 This volume offers an evaluation of the Schengen Information System and border control co operation from a transparency and proportionality perspective It also incorporates a legal descriptive analysis of the co operation in order to accommodate the changes and developments that occurred during the writing period The transparency and proportionality perspectives are developed from human rights and data protection criteria Transparency is understood as knowledge and accessibility to legal information as well as openness and accountability On the other hand proportionality is a requirement for guidance balance and justification as well as a need to avoid excessiveness and arbitrariness in border control work The final findings reveal that the Schengen co operation suffers from a deficiency of transparency and proportionality Consequently measures are proposed to augment the deficiency Even as this study was reaching its conclusion fundamental legislative changes closely similar to some of the arguments and recommendations projected in this study took place The efficacy of these changes is yet to be discerned
