Leisure Migration:

Leisure Migration József Böröcz, 1996 **ORRRC Study Report** United States. Outdoor Recreation Resources Review Commission, 1962 *From Pilgrimage to Package Tour* David L. Gladstone, 2013-01-11 When people in First World countries think of tourists in the vast expanses of the Third World today they typically think of pampered westerners filling up the luxury hotels and imposing their Orientalist gazes on the teeming masses As David Gladstone shows us in this fascinating and provocative book such preconceptions are wrong Coupling incisive and colorful ethnographic accounts of tourism in India and Mexico with sharp analysis Gladstone demonstrates the amazing complexity of this industry which now comprises close to ten percent of the world economy As he also shows the vast majority of tourists in the Third World are indigenous people with few resources often making pilgrimages to religious shrines *From Pilgrimage to Package Tour* is a fresh and entirely original account that stands tourism studies on its head and proves that this industry is far more complicated than it initially appears **Music, Forced Migration and Emplacement** Nicola De Martini Ugolotti, 2024-07-12 This book analyses the negotiation of place belonging and uncertainty enacted by a group of 60 men and women seeking asylum who gathered weekly in a community space in Bristol UK to share songs memories laughter and precariousness with other established and new city dwellers Building on a rich corpus of ethnographic data this book explores music making to address what goes unnoticed in existing ways of thinking about forced migration By looking at the junctures where leisure forced migration and urban analyses intersect with grassroot solidarity with and by people seeking asylum it offers an interdisciplinary reading of music forced migration and emplacement for scholars across leisure anthropology sociology and geography This book contributes and provokes novel discussions regarding refugees everyday experiences and negotiations of precariousness suspension and marginality in Britain *Lifestyle Migration* Michaela Benson, 2016-05-06 Relatively affluent individuals from various corners of the globe are increasingly choosing to migrate spurred on by the promise of a better and more fulfilling way of life within their destination Despite its increasing scale migration academics have yet to consolidate and establish lifestyle migration as a subfield of theoretical enquiry until now This volume offers a dynamic and holistic analysis of contemporary lifestyle migrations exploring the expectations and aspirations which inform and drive migration alongside the realities of life within the destination It also recognizes the structural conditions and constraints which frame lifestyle migration laying the groundwork for further intellectual enquiry Through rich empirical case studies this volume addresses this important and increasingly common form of migration in a manner that will interest scholars of mobility migration lifestyle and culture across the social sciences **Mexican Migration to the United States** Steven S. Zahniser, 2021-11-18 First Published in 1999 This book evaluates the influence of migration networks and human capital accumulation on Mexican migration to the United States Because these two factors directly affect the costs and benefits of migration they have a tremendous impact on Mexican migration They shape its composition determine its size and regulate its pace *Migrating*

Understanding Tourism Mobilities in Japan Hideki Endo, 2020-10-08 The total number of foreign tourists received in countries throughout the world was 530 million in 1995 That number broke through the 1 billion mark for the first time in 2012 at 1 035 000 000 In 2015 it reached 1 180 000 000 According to Anthony Elliott and John Urry modern society has been characterized as being mobile and within that we are also living mobile lives In modern society flows of people things capital information ideas and technologies are constantly occurring and as they are merging like a violently rushing stream what could be termed a landscape of mobilities has appeared Social realities are in flux and are transforming to become different than they were before This volume will expand the inquiry of tourism mobilities comprehensively and clearly from the fields of humanities and social sciences In particular tourism mobilities has been actively investigated up to now in the UK US Europe and Australia but even though the Japanese body of literature contains a great many excellent studies of Japanese examples there are almost no English language articles presenting their results Publishing examples of Japanese tourism mobilities will not only foster new and exciting lines of inquiry for existing and future research on tourism mobilities but will also have implications for humanities and social sciences throughout the world

Transnational Lives Anne-Meike Fechter, 2016-02-24 Privileged migrants such as expatriates living abroad are typically associated with lives of luxury in exotic locations This fascinating and in depth study reveals a more complex reality By focusing on corporate expatriates the author provides one of the first book length studies on transnationalism from above The book draws on the author's extended research among the expatriate community in Jakarta Indonesia The findings which relate to expatriate communities worldwide provide a nuanced analysis of current trends among a globally mobile workforce While acknowledging the potentially empowering impact of transnationalism the author challenges current paradigms by arguing that the study of elite migration shows that transnational lives do not always entail fluid identities but the maintenance of boundaries of body race and gender The rich ethnographic data adds a critical dimension to studies of migration and transnationalism filling a distinct gap in terms of theory and ethnography Written in an engaging and accessible style the book will be of interest to academics and students particularly in anthropology migration studies and human geography

Advancing the Regional Commons in the New East Asia Siriporn Wajjwalku, Kong Chong Ho, Osamu Yoshida, 2016-01-22 *Advancing the Regional Commons in the New East Asia* highlights a number of interests which members of ASEAN and Plus Three countries collectively recognize. This set of common interests includes not only economic development but also social development. Written by nationals in their respective countries, the different chapters in this volume highlight the different foundations for such common interests and these reflect the different constructive ways in which ASEAN and Plus Three countries come to see a multi-strand cooperative partnership. The task of advancing the regional commons will involve efforts to recognise and nurture ASEAN's and Plus Three's common interests in terms of broad social development, managing regional security issues, the development of a regional infrastructure and ensuring collective progress for all member countries. ASEAN becomes a community in 2015 and the idea of embracing, protecting, sustaining and advancing the regional commons become a vital process. Concurrently, APT has also realized that its contribution to the achieving goal of community and promoting regional commons is absolutely critical for both ASEAN and the Plus Three countries. Academics will find in this volume a clear analytical treatment of issues which regional groupings are currently facing and this can provide the basis for a comparative analysis. This volume will also be of interest to students and the general public looking for a systematic introduction to the successful implementation of cooperative ventures and also an assessment of the new collaborative energies which shape this dynamic region

Transnational Conflicts William I. Robinson, 2020-05-05 In this timely and provocative study, William I. Robinson challenges received wisdom on Central America. He starts with an exposition on the new global capitalism. Then drawing on a wide range of historical documentation, interviews and social science research, he proceeds to show how capitalist globalization has thoroughly transformed the region, disrupting the conventional pattern of revolutionary upheaval, civil wars and pacification and ushering in instead a new transnational model of economy and society. Beyond his focus on Central America, Robinson provides a critical framework for understanding development and social change in other regions of the world in the age of globalization. Demonstrating how the very forces of capitalism have brought into being new social agents and political actors unlikely to acquiesce in the face of the emerging order, *Transnational Conflicts* shows why the Isthmus, along with other regions, is likely to return to the headlines in the near future

Memory, Migration and Travel Sabine Marschall, 2018-05-16 Migration and forcible displacement are growing and impactful dynamics of the current global age. These processes generate mobility flows, travel patterns and touristic behaviour driven by personal and collective memories. The chapters in this book highlight the importance of travel and tourism for enabling such memories and memory-based identity practices to unfold. This book investigates how diasporic communities, transnational migrants, refugees and the internally displaced recreate home in their host place of residence through material culture, performativity and social relations and how involuntary, tangible and

intangible stimuli evoke memories of home It explores an array of diverse geographical contexts balancing ethnographic vignettes of contemporary migrant societies with archival research providing historical accounts that reach back more than a century Memory Migration and Travel makes an original contribution by linking the emergent field of memory studies to the disciplines of tourism and migration diaspora studies and will be of interest to students and researchers in the fields of tourism geography migration diaspora studies anthropology and sociology
