Charting space Elize Mazadiege,2023-10-10 By the late 1960s cartographic formats and spatial information had become a regular feature in many conceptual artworks This volume offers a rich study of conceptualisms mapping practices that includes more expanded forms of spatial representation The book presents twelve in depth case studies that address artists engagement with matters of space at a time when space was garnering new significance in art theory and culture The chapters shed fresh light on an evident spatial turn that took place from the postwar to the contemporary period revealing how it was influenced by larger historical social and cultural contexts In addition to raising questions about conceptualism s

relationship to the world the contributors illustrate how artists cartographies served as critical sites for formulating their politics upsetting prevailing systems and graphing new heterogenous spaces **British Museum Catalogue of printed Books** ,1881 Book-auction Records Frand Karslake,1903 A priced and annotated annual record of London New York and Edinburgh book auctions
