Leningrad Nights:

Through Dark Days and White Nights Naomi F. Collins, 2012-01-06 This memoir of an American woman's life in Moscow traces the social and cultural evolution of Russia from the era of Krushchev to the era of Putin. In the mid 1960s Naomi Collins was a graduate student at Moscow State University. As the 21st century began she was the wife of the American Ambassador to Russia. In this insightful memoir she shares her reflections and impressions of life as an American woman living in the Russian capital over the course of four decades. Rather than retracing the economic and political events of the period Collins focuses her narrative on daily life as it changed over the years. She offers fascinating anecdotal snapshots that reveal rare insight into the evolving state of the nation. This book is like a script for a documentary spanning four decades when an especially astute and literate observer watched Russia emerge from stagnation and enter a period of dramatic economic, social, and political change, and on many fronts upheaval. Strobe Talbott, President of the Brookings Institution.

Black Girl in Moscow, a Memoir Jacqueline Clay Chester, 2014-08-15 While a student at the Fashion Institute of Technology in New York City, Jacqueline began her modeling career as a runway model for a hot new fashion show. The American National Exhibition in Moscow, a presentation of New York's Fashion Industries, would take Jacqueline to the bustling city of Moscow, Russia. As an African American model in the then Soviet Union, her national and international fame grew. Articles about her appeared in *The New York Times*, *Life Magazine*, *Pittsburgh Courier*, *Ebony Magazine*, *Sepia Magazine*, *Time Magazine*, *Paris Match*, and many other publications, touting Jacqueline as a stunning model bringing her American charm to Russian audiences. After her successful return to New York City, she signed with the Grace del Marco Agency, where she worked with many photographers, including Hiro, the world-famous fashion photographer from Japan. Hiro's photograph of Jacqueline appeared in the Sunday Magazine Section of *The New York Times*, making Jacqueline the first African American female model to appear in that highly esteemed publication. Many other modeling assignments followed, including her classic album cover for pianist Red Garland's *The Nearness of You*, now also in CD format. Jacqueline designs a jewelry line and is a scholarship winner to the Arts Students League in New York. She is also an artist. A native New Yorker who presently resides in Atlanta, Georgia, Jacqueline is the mother of three children and the grandmother of four. **Against the New Gods and**

So fascinating are its achievements that no special effort is needed to attract attention. Nonetheless, the science of the heavens is not only a collection of astonishing revelations and daring theories. Ordinary facts, things that happen day by day, are its substance. Most laymen have generally

speaking a rather hazy notion of this prosaic aspect of astronomy They find it of little interest for it is indeed hard to concentrate on what is always before the eye Everyday happenings in the sky are the contents of this book free from professional terminology with easy reading Its purpose is to initiate the reader into the basic facts of astronomy Ordinary facts with which you may be acquainted are couched here in unexpected paradoxes or slanted from an odd and unexpected angle solely to excite the imagination and quicken your interest The daily aspect of the science of the skies its beginnings not later findings that mainly form the contents of Astronomy for Entertainment The purpose of the book is to initiate the reader into the basic facts of astronomy Ordinary facts with which you may be acquainted are couched here in unexpected paradoxes or slanted from an odd and unexpected angle The theme is as far as possible free from terminology and technical paraphernalia that so often make the reader shy of books on astronomy Books on popular science are often rebuked for not being sufficiently serious In a way the rebuke is just and support for it can be found if one has in mind the exact natural sciences in the tendency to avoid calculations in any shape or form And yet the reader can really master his subject only by learning how to reckon even though in a rudimentary fashion True he has taken care to present them in an easy form well within the reach of all who have studied mathematics at school It is his conviction that these exercises help not only retain the knowledge acquired they are also a useful introduction to more serious reading This book contains chapters relating to the Earth the Moon planets stars and gravitation The author has concentrated in the main on materials not usually discussed in works of this nature Subjects omitted in the present book will he hopes be treated in a second volume The book it should be said makes no attempt to analyze in detail the rich content of modern astronomy Unfortunately Y Perelman never wrote the continuation he had planned for this book as untimely death in war bound Leningrad in 1942 interrupted his labours
