online tests and quizzes give you a fast way to pinpoint what you really know and what you should spend more time studying. Improve Your Score Armed with your score reports you can personalize your study plan. Review the parts of the book where you are weakest and use the REA Study Center to create your own unique e flashcards adding to the 100 free cards included with this book. Visit The REA Study Center for a suite of online tools. The best way to personalize your study plan is to get frequent feedback on what you know and what you don't know. At the online REA Study Center you can access three types of assessment: topic level quizzes, mini tests, and a full length practice test. Each of these tools provides true to format questions and delivers a detailed score report that follows the topics set by the College Board. Topic Level Quizzes Short 15 minute quizzes are available throughout the review and test your immediate understanding of the topics just covered. Mini Tests Three online mini tests cover what you've studied. These tests are like the actual AP exam only shorter and will help you evaluate your overall understanding of the subject. 2 Full Length Practice Tests 1 for Calculus AB and 1 for Calculus BC. After you've finished reviewing the book take our full length practice exams to practice under test day conditions. Available both in the book and online these tests give you the most complete picture of your strengths and weaknesses. We strongly recommend you take the online versions of the exams for the added benefits of timed testing, automatic scoring, and a detailed score report. Improving Your Score with e Flashcards With your score reports from the quizzes and tests you'll be able to see exactly which AP Calculus topics you need to review. Use this information to create your own flashcards for the areas where you are weak. And because you will create these flashcards through the REA Study Center you can access them from any computer or smartphone. REA's All Access test prep is a must have for students taking the AP Calculus AB/BC exams.

Foundations for the Future in Mathematics Education

Richard A. Lesh, Eric Hamilton, James J. Kaput, 2020-10-07 The central question addressed in *Foundations for the Future in Mathematics Education* is this What kind of understandings and abilities should be emphasized to decrease mismatches between the narrow band of mathematical understandings and abilities that are emphasized in mathematics classrooms and tests and those that are needed for success beyond school in the 21st century This is an urgent question In fields ranging from aeronautical engineering to agriculture and from biotechnologies to business administration outside advisors to future oriented university programs increasingly emphasize the fact that beyond school the nature of problem solving activities has changed dramatically during the past twenty years as powerful tools for computation conceptualization and communication have led to fundamental changes in the levels and types of mathematical understandings and abilities that are needed for success in such fields For K 12 students and teachers questions about the changing nature of mathematics and mathematical thinking beyond school might be rephrased to ask If the goal is to create a mathematics curriculum that will be adequate to prepare students for informed citizenship as well as preparing them for career opportunities in learning organizations in knowledge economies in an age of increasing globalization how should traditional conceptions of the 3Rs be extended or reconceived Overall this book suggests that it is not enough to simply make incremental changes in the existing curriculum whose traditions developed out of the needs of industrial societies The authors beyond simply stating conclusions from their research use results from it to describe promising directions for a research agenda related to this question The volume is organized in three sections Part I focuses on naturalistic observations aimed at clarifying what kind of mathematical thinking people really do when they are engaged in real life problem solving or decision making situations beyond school Part II shifts attention toward changes that have occurred in kinds of elementary but powerful mathematical concepts topics and tools that have evolved recently and that could replace past notions of basics by providing new foundations for the future This section also initiates discussions about what it means to understand the preceding ideas and abilities Part III extends these discussions about meaning and understanding and emphasizes teaching experiments aimed at investigating how instructional activities can be designed to facilitate the development of the preceding ideas and abilities *Foundations for the Future in Mathematics Education* is an essential reference for researchers curriculum developers assessment experts and teacher educators across the fields of mathematics and science education
