How to Create a Culture of Achievement in Your School and Classroom Douglas Fisher, Nancy Frey, Ian Pumpian, 2012-04-26 What does it feel like to walk into your school Is it a welcoming place where everyone feels valued Most school improvement efforts focus on academic goals instructional models curriculum and assessments But sometimes what can make or break your learning community are the intangibles the relationships identity and connections that make up its culture Authors Fisher Frey and Pumpian believe that no school improvement effort will be effective unless school culture is addressed They identify five pillars that are critical to building a culture of achievement 1 Welcome Imagine if all staff members in your school considered it their job to make every student parent and visitor feel noticed welcomed and valued 2 Do no harm Your school rules should be tools for teaching students to become the moral and ethical citizens you expect them to be 3 Choice words When the language students hear helps them tell a story about themselves that is one of possibility and potential students perform in ways that are consistent with that belief 4 It s never too late to learn Can you push students to go beyond the minimum needed to get by to discover what they are capable of achieving 5 Best school in the universe Is your school the best place to teach and learn The best place to work Drawing on their years of experience in the classroom the authors explain how these pillars support good teaching and learning In addition they provide 19 action research tools that will help you create a culture of achievement so that your school or classroom is the best it can be After reading this book you ll see why culture makes the difference between a school that enables success for all students and a school that merely houses those students during the school day

Relativity in Curved Spacetime Eric Baird, 2007 Relativity theory has become one of the icons of Twentieth Century science It is reckoned to be a difficult subject taught as a layered series of increasingly difficult mathematics and increasingly abstract concepts We are told that relativity theory is supposed to be this complicated and counter intuitive But how much of this historical complexity is really necessary Can we bypass the interpretations and paradoxes and pseudoparadoxes of Einstein's special theory and jump directly to a deeper and more intuitive description of reality What if curvature is a fundamental part of physics and a final theory of relativity shouldn't reduce to Einstein's flat 1905 theory on principle Relativity takes us on a whistlestop tour of Twentieth Century physics from black holes quantum mechanics wormholes and the Big Bang to the workings of the human mind and asks what would physics look like without special relativity 394 printed

African Metaphysics, Epistemology and a New Logic Jonathan O. Chimakonam, L. Uchenna Ogbonnaya, 2021-05-06 This book focuses on African metaphysics and epistemology and is an exercise in decoloniality The authors describe their approach to decoloniality as an intellectual repudiation of coloniality using the method of conversational thinking grounded in Ezumezu logic Focusing specifically on both African metaphysics and African epistemology the authors put forward theories formulated to stimulate fresh debates and extend the frontiers of learning in the field They emphasize that this book is not a project in comparative philosophy nor is it geared towards making Africa the object subjects of philosophy Rather the book highlights and discusses philosophical insights that have been produced from the African perspective which the authors argue must be further developed in order to achieve decoloniality in the field of philosophy more broadly

"The Human Pathway" JIM KNUT. LARSSON, 2010-11-15 Jim Knut Larsson establishes that the foundation for freewill meaning and purpose is anchored in the latest findings in quantum mechanics and cosmology empowering us to create the future *The Human Pathway* is destined to become the catalyst for a transformation in politics justice government economics and spiritualism What choices does humanity need to make now in order to avoid destruction What goals can we set up to maximize meaning and purpose both for the individual and also for all of humanity *The Human Pathway* might be the most important inspiring and interesting book you will ever read Our future depends upon your participation Also included as an addendum What to do in case of arrest It could save your life or someone close to you A must read Some more questions What is enlightenment Why the earth created humans What would be the ultimate goals for humanity How can you unleash your creative powers and create your own future Why every act movement and thought is a manifestation of freewill and why it affects the evolution of the universe Why the living standard in the US declines daily Why there are more than 3 million people in jail and more than 50 million with a criminal record People in America always talk about they Back then they castrated people who were

homosexuals They had strict laws against sodomy They did radiation experiments on the population The question is who are they Revelation Does it matter if you are resurrected at some point in the future It is your desire to know the truth that drives your desire for resurrection You will live forever as long as humanity or if human intelligence lives on forever because what is living even if your ego is dead is you being one with humanity Individuals only manifest by their clinging to their egos This clinging prevents you from becoming creative happy and blissful If you get rid of your ego which should be everybody's goal you will dedicate yourself to the eternal now and to serve humanity A great quest is to help humanity reach its highest potential and to achieve absolute knowledge finish the creation of the universe and acquire the power to recreate everything that existed forever Then at that point you will be resurrected However there is a final revelation and if it is revealed to you it will give you absolute knowledge and peace This final revelation is the logical conclusion of this book Understand what is written and the truth will be revealed to you When it is you will understand that it cannot be directly communicated and understood by others unless they have the same revelation You will know that you have the final knowledge when you get the revelation and you don't need to seek validation for it However you want to share it with others Study the revelations in this book and hopefully you will get it You will know it when you do We need to dismantle many laws and make society free again We must get the government out of our lives The benefit you get from reading my book is that you will be able to see through the myths When you read my book you will become an enlightened person Actually after you read this book you will say I'm enlightened now You will have revelations that will make you enjoy life more and become a happier person but also you will no longer be seduced by propaganda This in the end is a book of cosmic and spiritual enlightenment and enlightenment with regard to politics economics and justice What does it mean to be an enlightened person who helps secure the future prosperity and excitement of living for yourself and for humanity as a whole Another bonus from this book is that you may no longer fear death You will become a participant in the conversation and the future goals and aspirations of humanity
