How to Stop Crime Anthony V. Bouza, 2013-11-11 How to stop crime? Megan's Law as a strategic approach to crime prevention in the USA Ariane Peters, 2005-04-15 Seminar paper from the year 2005 in the subject American Studies Culture and Applied Geography grade 1.7 Ernst Moritz Arndt University of Greifswald Anglistik Amerikanistik language English abstract The United States is known worldwide for its serious crime problem Nobody knows exactly what the actual crime rate is in America but everybody knows it is too high 1 In fact total crime rates in the USA are significantly higher than in other industrialized countries By 1998 nearly six million people almost 3% of the adult population were under some form of correctional supervision 2 These developments have had important consequences for criminal justice institutions More than 1000 new prisons have been built in the United States since 1980 3 Today state prisons are forced to operate above their capacity If you have a closer look at the criminal justice system of the United States you could get the impression that crime is the product and punishment is the answer Especially conservative politicians together with the mass media and activists in the victim rights movement advanced that the criminal justice system has become more and more punitive since the late 1960s This development is documented at great length In order to explain the increasing crime rates most criminologists and sociologists have devoted their attention to examining the causes of crime The scientific and public discussion about how to stop crime is going to be continued because there is no definitive recipe for a safer society Nevertheless it is undisputed that crime must be prevented This paper deals with Megan's Law which was enacted in the United States to prevent the victimization of children It is America's first law authorizing public notification when dangerous sex offenders are released into the community Firstly I will define the terms crime and crime prevention to come to a better understanding of this complex theme Secondly I will examine several attempts to define crime prevention Thirdly I will compare the arguments for and against Megan's Law in order to answer the following questions Is this law really helpful to protect the society against sexual abuse And if this is not the case what could be done to prevent and even reduce sexual abuse Finally I will make a concluding assessment and give a short summary of the themes explored in this paper **Stop! Crime Scene** Domnauer, 2013-01-30 Bright yellow tape surrounds a crime scene Welcome to your first case Stop Crime Scene gives the reader a behind the scenes peek at the exhilarating crime scene investigation process It will take reader from first responders arriving at a scene to criminals being tried in a court of law Spectrum R Readers are the perfect Common Core aligned tool to support the development of nonfiction reading skills crucial to a young reader's success Each leveled reader features high interest informational content exciting full color photo illustrations and Common Core aligned comprehension practice focused on the development of critical thinking skills This multilevel series is the perfect addition to any library at school or home **Smarter Crime Control** Irvin Waller, 2013-12-05 The U S is the world's biggest jailor and one of the most affluent murderous countries and yet its citizens pay more taxes to sustain law and order than their European

counterparts Yet the U S has the most data in the world on the use of incarceration and its failure Its researchers have identified more projects able to prevent violence than the rest of the world put together Its legislators have access to pioneering data banks on cost effective ways to use taxes to reduce crime We are left wondering why we cannot implement measures that we know will work reduce crime and cost less for law and order Smarter Crime Control shows how to use recent knowledge and best practices to reduce the extraordinarily high rates of murder traffic fatalities drug overdoses and incarceration while avoiding the high taxes paid by families for policing and prisons Providing detailed examples Irvin Waller offers specific actions our leaders at all levels can take to reduce violence and lower costs to taxpayers He focuses on how to retool policing and improve corrections to reduce reoffending and crime while limiting criminal courts He also shows how programs and investments in various strategies can help those youth on the path to chronic offending avoid the path all together Waller shows how to get smart on crime to shift the criminal justice paradigm from the failing outdated racially biased and exorbitant complex today to an effective modern fair and lean system for safer communities that spares so many victims from the loss and pain of preventable violence He makes a compelling case for reinvesting what is currently misspent on reacting to crime into smart ways to prevent crime Ultimately he demonstrates to readers the importance of reevaluating our current system and putting into place proven strategies for crime and violence prevention that will keep people out of jail and make our streets and communities safer for everyone
