The Claims of Experience Nolan

Bennett, 2019-08-21 Why have so many figures throughout American history proclaimed their life stories when confronted by great political problems? *The Claims of Experience* provides a new theory for what makes autobiography political throughout the history of the United States and today. Across five chapters, Nolan Bennett examines the democratic challenges that encouraged a diverse cast of figures to bear their stories: Benjamin Franklin amid the revolutionary era; Frederick Douglass in the antebellum and abolitionist movements; Henry Adams in the Gilded Age and its anxieties of industrial change; Emma Goldman among the first Red Scare and state opposition to radical speech; and Whittaker Chambers amid the second Red Scare that initiated the anticommunist turn of modern conservatism. These historical figures made what Bennett calls a claim of experience. By proclaiming their life stories, these authors took back authority over their experiences from prevailing political powers and called to new community among their audiences. Their claims sought to restore to readers the power to remake and make meaning of their own lives. Whereas political theorists and activists have often seen autobiography to be too individualist or a mere documentary source of evidence, this theory reveals the democratic power that life narratives have offered those on the margins and in the mainstream. If they are successful, claims of experience summon new popular authority to surpass what their authors see as the injustices of prevailing American institutions and identity. Bennett shows through historical study and theorization how this renewed appreciation for the politics of life writing elevates these authors' distinct democratic visions while drawing common themes across them. This book offers both a method for understanding the politics of life narrative and a call to anticipate claims of experience as they appear today.

Power and the Professions in

Britain 1700-1850 Penelope J. Corfield, Penelope J. Corfield, 2012-10-12 The modern professions have a long history that predates the development of formal institutions and examinations in the nineteenth century. Long before the Victorian era, the emergent professions wielded power through their specialist knowledge and set up informal mechanisms of control and self-regulation. Penelope Corfield devotes a chapter each to lawyers, clerics, and doctors and makes reference to many other professionals: teachers, apothecaries, governesses, army officers, and others. She shows how, as the professions gained in power and influence, so they were challenged increasingly by satire and ridicule. Corfield's analysis of the rise of the professions

during this period centres on a discussion of the philosophical questions arising from the complex relationship between power and knowledge **An Act to Incorporate the Carpenters' Company of the City and County of Philadelphia**
