## **Land Degradation:**

Economics of Land Degradation and Improvement – A Global Assessment for Sustainable Development Ephraim Nkonya, Alisher Mirzabaev, Joachim von Braun, 2015-11-11 This volume deals with land degradation which is occurring in almost all terrestrial biomes and agro ecologies in both low and high income countries and is stretching to about 30% of the total global land area About three billion people reside in these degraded lands However the impact of land degradation is especially severe on livelihoods of the poor who heavily depend on natural resources The annual global cost of land degradation due to land use and cover change LUCC and lower cropland and rangeland productivity is estimated to be about 300 billion USD Sub Saharan Africa SSA accounts for the largest share 22% of the total global cost of land degradation Only about 38% of the cost of land degradation due to LUCC which accounts for 78% of the US 300 billion loss is borne by land users and the remaining share 62% is borne by consumers of ecosystem services off the farm The results in this volume indicate that reversing land degradation trends makes both economic sense and has multiple social and environmental benefits On average one US dollar investment into restoration of degraded land returns five US dollars The findings of the country case studies call for increased investments into the rehabilitation and restoration of degraded lands including through such institutional and policy measures as strengthening community participation for sustainable land management enhancing government effectiveness and rule of law improving access to markets and rural services and securing land tenure The assessment in this volume has been conducted at a time when there is an elevated interest in private land investments and when global efforts to achieve sustainable development objectives have intensified In this regard the results of this volume can contribute significantly to the ongoing policy debate and efforts to design strategies for achieving sustainable development goals and related efforts to address land degradation and halt biodiversity loss Climate and Land Degradation Mannava VK Sivakumar, Ndegwa Ndiang'ui, 2007-10-11 Based on an International Workshop held in Arusha Tanzania this book presents state of the art papers real world applications and innovative techniques for combating land degradation It offers recommendations for effectively using weather and climate information for sustainable land management practices **Land Degradation** Douglas L. Johnson, Laurence A. Lewis, 2007 This up to date second edition of Land Degradation explores substantial decreases in the land's biological productivity or usefulness to humans due to human activities Case studies cover the history of land degradation local and regional effects of human interactions with the environment and both negative and positive aspects of land modification Extensively illustrated Land Degradation can be used as the primary text in a course of the same name or as a supplement in courses covering land use environmental change and sustainability Soil Degradation in the United States Rattan Lal, Thomas Iivari, John M. Kimble, 2003-09-25 Soil Degradation in the United States Extent Severity and Trends examines the magnitude and severity of soil degradation by different processes in the U S including water erosion wind erosion C depletion soil compaction salt build up and soil

contamination In addition it addresses policy issues with regard to economic and environmental **Land Degradation and Society** Piers Blaikie, Harold Brookfield, 2015-07-30 Why does land management so often fail to prevent soil erosion deforestation salination and flooding How serious are these problems and for whom This book first published in 1987 sets out to answer these questions which are still some of the most crucial issues in development today using an approach called regional political ecology This approach acknowledges that the reason why land management can fail are extremely varied and must include a thorough understanding of the changing natural resource base itself the human response to this and broader changes in society of which land managers are a part Land Degradation and Society is essential reading for all students of geography agriculture social sciences development studies and related subjects Understanding Land Degradation Stanley Weeraratna, 2022-09-27 Much of the earth's population is dependent on agriculture as it provides food for their sustenance Successful crop production depends to a considerable extent on land and climate Soil is the main component of land and a fertile soil is essential for crop growth However soil fertility declines over the years mainly due to land degradation Hence implementing appropriate measures to control land degradation is important It is the responsibility of the farmers and the governments to take action to control land degradation Agricultural extension officers are involved in making farmers aware of land degradation and control measures Planners and policy makers need scientific assessments on land degradation and its implications so that they could advice the relevant authorities who prepare the national programs and budgets This book highlights issues related to land degradation the causal factors and methods of control The audience is agricultural practitioners and planners as well as students of agriculture Environmentalists would also benefit by understanding the main issues related to land degradation discussed **Land Degradation and Desertification: Assessment, Mitigation and Remediation** Pandi Zdruli, Marcello Pagliai, Selim Kapur, Angel Faz Cano, 2010-07-20 Land Degradation and Desertification Assessment Mitigation and Remediation reports research results in sustainable land management and land degradation status and mitigation in 36 countries around the world It includes background papers with continental and international perspectives dealing with land degradation and desertification studies The book assembles various topics of interest for a large audience They include carbon sequestration and stocks modern techniques to trace the trends of land degradation traditional and modern approaches of resource base conservation soil fertility management reforestation rangeland rehabilitation land use planning GIS techniques in desertification risk cartography participatory ecosystem management policy analyses and possible plans for action Various climatic domains in Africa Asia Europe and The Americas are covered The book will be of interest to a variety of environmental scientists agronomists national and international policy makers and a number of organizations dealing with sustainable management of natural resources Land Degradation and Forest Management Gopal Shukla, Arun Jyoti Nath, Sumit Chakravarty, Pankaj Panwar, Ajay Sharma, 2025-01-06 Land degradation meaning any reduction or loss in the biological or economic productive capacity of the

land resource base is a global problem Land water and forest resources can become degraded due to poor and often short sighted management In this context land degradation neutrality LDN is an approach that counterbalances the expected loss of productive land with the restoration of degraded areas Forests are a major land use cover that covers about 30 per cent of the land on Earth and thus hold great potential to help not only achieve LDN but also make Sustainable Development Goals SDGs a reality This Research Topic will focus on forest management and restoration for achieving land degradation neutrality The topic will focus on the various drivers of degradation such as deforestation climate change forest ecosystem fragmentation invasive species etc as well as the management and restoration approaches that would help achieve land degradation neutrality These approaches may include reforestation and afforestation natural regeneration agroforestry enrichment planting protected areas invasive species management etc Other approaches are the promotion of private sector engagement and carbon markets larger government subsidies and other financial support for forestry and forest management activities

**Climate and Land Degradation** Ndegwa Ndiang'ui, 2007-08-28 Based on an International Workshop held in Arusha Tanzania this book presents state of the art papers real world applications and innovative techniques for combating land degradation It offers recommendations for effectively using weather and climate information for sustainable land management practices

**Land Degradation, Desertification and Climate Change** Mark S. Reed, Lindsay C. Stringer, 2016-04-28 Although much is known about the processes and effects of land degradation and climate change little is understood about the links between them Less still is known about how these processes are likely to interact in different social ecological systems around the world or how societies might be able to adapt to this twin challenge This book identifies key vulnerabilities to the combined effects of climate change and land degradation around the world It identifies triple win adaptations that can tackle both climate change and land degradation whilst supporting biodiversity and ecosystem services The book discusses methods for monitoring effects of climate change and land degradation and adaptations to these processes It argues for better co operation and knowledge exchange so that the research land user and policy communities can work together more effectively to tackle these challenges harnessing the wisdom of crowds to assess vulnerability and adapt to climate change and land degradation whilst protecting livelihoods and biodiversity

**Global Degradation of Soil and Water Resources** Rui Li, Ted L. Napier, Samir A. El-Swaify, Mohamed Sabir, Eduardo Rienzi, 2022-01-29 This book focuses on soil and water conservation at global scale It is a serious environmental problem that will threaten the socio economic well being of the majority of global population in future The book examines the current situation of land degradation in multiple regions of the world and offers alternative approaches to solve the problems through sharing advanced technologies and lessons learned It provides comprehensive assessment on characteristics level and effect of degradation in different regions It s a highly informative reference both for researchers and graduate students

**Land Degradation and Desertification** Abiud Kaswamila, 2016-10-26 Land degradation which is caused by multiple forces

extreme weather conditions and anthropogenic activities that pollute or degrade the quality of soils and land utility negatively affects food production livelihoods and the provision of other ecosystem goods and services Land degradation can also lead to climate change and affect human health The problem is more pronounced in least developing countries due to overdependence of natural resources for survival Sustainable ways to reduce land degradation and desertification demand research and advocacy of sustainable land management practices This book is organized into two sections The first section covers three major aspects viz an understanding of patterns of land degradation and desertification for developing mitigation strategies land atmosphere interaction from response of land cover to climate change effects of Karst rocky desertification and the effect of unprecedented human activity into land degradation and desertification processes using natural and human induced landscape research The last section dwells on the relationship between soil degradation and crop production and an examination on how land degradation impacts the quality of soil in communal rangelands Environmentalists land use planners ecologists pedologists researchers and graduate students will find this book to be an essential resource

biodiversity      *Land Degradation in Tanzania* Alemneh Dejene,1997-01-01 World Bank Technical Paper No 370 Local land users and officials often have conflicting perceptions of and responses to land degradation issues This causes problems for officials in diagnosing and addressing the issue and is a major constraint on the successful implementation of policies and projects to address land degradation This study looks at the perception and response gap between officials and land users in the diagnosis and remedy of land degradation It also examines the dynamics of the loss of soil fertility and low productivity at the village level The study s findings will help shape investment programs to enhance land productivity in Sub Saharan Africa

**Handbook for the Field Assessment of Land Degradation** Michael Stocking,Niamh Murnaghan,2001 First Published in 2001 Routledge is an imprint of Taylor Francis an informa company      Soil Degradation, Restoration and Management in a Global Change Context ,2019-10-28 Soil Degradation Restoration and Management in a Global Change Context volume four in the Advances in Chemical Pollution Environmental Management and Protection series explores a wide breadth of emerging and state of the art technologies and provides the best practices to manage soils affected by degradation Soils are the base of life thus a sustainable soil management is crucial in a context of global environmental change Chapters in this new release include Soil degradation processes future treats and possible solutions Agriculture and grazing environments Abandoned and afforested lands Environments affected by fire Mining environments Urban areas and Lands affected by war Covers a wide breadth of emerging and state of the art technologies Includes contributions from an international board of authors Provides a comprehensive set of reviews Synthesizes all aspects involved in soil degradation      **Response to Land Degradation** E M Bridges,2019-04-24 This work is intended for advanced readers interested in methods of sustainable land management the prevention and control of land degradation It offers a coherent view of the situation concerning land degradation and the human response to the problem It is generally recognized that technological solutions alone cannot solve the problems of land degradation This book discusses the role of land use and land management policies programmes insitutional innovations and economic incentives for the control and prevention of land degradation Special attention is given to legal issues at the international level and in individual countries      **The Global Environmental Benefits of Land**

**Degradation Control on Agricultural Land** Stefano Pagiola,1999-01-01 This book focuses on the global effects of land degradation but emphasizes other important levels of land degradation at the field level it may result in reduced productivity at the national level it may cause flooding and sedimentation and at the global level it can contribute to climate changes damaging bio diversity and international waters The effects on climate changes are explored and the report questions the extent to which land degradation on agricultural land affects climate change Does it increase emissions of greenhouse gases Does it affect land s capacity to serve as a carbon sink Can appropriate management enhance both land s productivity and its capacity to store carbon The carbon cycle in soils is analyzed indicating land degradation is likely to reduce the ability of soils to serve as carbon sink and release stored carbon into the atmosphere and bio diversity effects are likely to be adverse Global

benefits of land degradation control include afforestation to allow increased carbon sequestration and provide adequate biodiversity habitats and community based wildlife management can provide alternatives to some marginal areas Although integrating global dimensions into land degradation control projects may reverse the field level or national problems it is causing difficulties and constraints will likely contribute to the failure of these projects
