Lefkandi I:

The Protogeometric Aegean Irene S. Lemos, 2002 This is the first full and up to date survey of Aegean archaeology at the beginning of the Iron Age late eleventh and tenth centuries BC since Snodgrass's classic *The Dark Age of Greece* 1971 These crucial 150 years in the development of ancient Greek society are known as the Protogeometric period after the characteristic pottery which was commonly in use in the Aegean The book offers a detailed account of old and new discoveries with chapters on pottery metal finds burial customs and architectural remains and how to use them to understand the social and political structure of the society This analysis of the material culture of the period covers not only well known sites such as Athens and Lefkandi but also other less familiar regions many of which are discussed in English for the first time In addition Dr Lemos examines a number of specific issues such as relative and absolute chronology the introduction of iron technology in the Aegean and the use of handmade pottery and jewellery The archaeological record is also used to suggest interpretations of the social and political structure of the society cult practices and the use of Homer in understanding the period The book challenges the description of the period from the collapse of the Mycenaean palace system to the formation of early Greek city states as the Dark Age of Greece Dr Lemos argues that some of the advances on socio economic structures towards the formation of states which were thought to belong to the eighth century BC might have started to develop much earlier in the course of the tenth century

The Connected Iron Age Jonathan M. Hall, James F. Osborne, 2022-12-09 An interdisciplinary consideration of how eastern Mediterranean cultures in the first millennium BCE were meaningfully connected The early first millennium BCE marks one of the most culturally diverse periods in the history of the eastern Mediterranean Surveying the region from Greece to Iraq one finds a host of cultures and political formations all distinct yet all visibly connected in meaningful ways These include the early polities of Geometric period Greece the Phrygian kingdom of central Anatolia the Syro Anatolian city states the seafaring Phoenicians and the biblical Israelites of the southern Levant Egypt's Twenty first through Twenty fifth Dynasties the Urartian kingdom of the eastern Anatolian highlands and the expansionary Neo Assyrian Empire of northern Mesopotamia This volume adopts an interdisciplinary approach to understanding the social and political significance of how interregional networks operated within and between Mediterranean cultures during that era

Ancient Greece Sigrid Deger-Jalkotzy, 2006-07-27 The period between the collapse of the Mycenaean civilization around 1200 BC and the dawning of the classical era four and half centuries later is widely known as the Dark Age of Greece not least in the eponymous history by A M Snodgrass published by EUP in 1971 and reissued by the Press in 2000 In January 2003 distinguished scholars from all over the world gathered in Edinburgh to re examine old and new evidence on the period The subjects of their papers were chosen in advance by the editors so that taken together they would cover the field This book based on thirty three of the presentations will constitute the most fundamental reinterpretation of

the period for 30 years The authors take issue with the idea of a Greek Dark Age and everything it implies for the understanding of Greek history culture and society They argue that the period is characterised as much by continuity as disruption and that the evidence from every source shows a progression from Mycenaean kingship to the conception of aristocratic nobility in the Archaic period The volume is divided into six parts dealing with political and social structures questions of continuity and transformation international and inter regional relations religion and hero cult Homeric epics and heroic poetry and the archaeology of the Greek regions Copiously illustrated and with a collated bibliography itself a valuable resource this book is likely to be the essential and basic source of reference on the later phases of the Mycenaean and the Early Greek Iron Ages for many years **The Aegean from Bronze Age to Iron Age** Oliver Dickinson,2006-09-27

Following Oliver Dickinson s successful *The Aegean Bronze Age* this textbook is a synthesis of the period between the collapse of the Bronze Age civilization in the thirteenth and twelfth centuries BC and the rise of the Greek civilization in the eighth century BC With chapter bibliographies distribution maps and illustrations Dickinson s detailed examination of material and archaeological evidence argues that many characteristics of Ancient Greece developed in the Dark Ages He also includes up to date coverage of the Homeric question This highly informative text focuses on the reasons for the Bronze Age collapse which brought about the Dark Ages the processes that enabled Greece to emerge from the Dark Ages the degree of continuity from the Dark Ages to later times Dickinson has provided an invaluable survey of this period that will not only be useful to specialists and undergraduates in the field but that will also prove highly popular with the interested general reader

oriented aristocratic banquet the symposion which literally means drinking together was a nocturnal wine party held by Greek aristocrats from Homer to Alexander the Great Its distinctive feature was the crucial importance of diverse cultural competitions including improvising convivial poetry among the guests Cultural skills and abilities were a prerequisite in order for one to be included in elite drinking circles and as such the symposion served as a forum for the natural selection of Greek aristocracy

Greece in the Making 1200-479 BC Robin Osborne, 2009-03-16 Greece in the Making 1200 479 BC is an accessible and comprehensive account of Greek history from the end of the Bronze Age to the Classical Period The first edition of this book broke new ground by acknowledging that barring a small number of archaic poems and inscriptions the majority of our literary evidence for archaic Greece reported only what later writers wanted to tell and so was subject to systematic selection and distortion This book offers a narrative which acknowledges the later traditions as traditions but insists that we must primarily confront the contemporary evidence which is in large part archaeological and art historical and must make sense of it in its own terms In

this second edition as well as updating the text to take account of recent scholarship and re ordering Robin Osborne has addressed more explicitly the weaknesses and unsustainable interpretations which the first edition chose merely to pass over He now spells out why this book features no rise of the polis and no colonization and why the treatment of Greek settlement abroad is necessarily spread over various chapters Students and teachers alike will particularly appreciate the enhanced discussion of economic history and the more systematic treatment of issues of gender and sexuality

Archaic Eretria Keith G. Walker, 2004-01-09 The first detailed history of one of the most prosperous and important Greek cities of the pre classical period

The Early Bronze Age Village on Tsoungiza Hill Daniel J. Pullen, 2011-12-31 While corridor houses such as the House of the Tiles at Lerna have provoked widespread discussion about the origins of social stratification in Greece few settlements of the Early Bronze Age ca 3100 to 2000 B C have been thoroughly excavated This important study integrates the presentation and analysis of the archaeological evidence from a single settlement that flourished on Tsoungiza Hill in the Nemea Valley from the Final Neolithic until the end of the Early Helladic period The first section details the stratigraphy architecture deposits and ceramics of each of the five major periods represented The second section contains specialist reports on all aspects of material culture including figurines and ornaments textiles and crafts metal analyses chipped and ground stone and faunal and palaeobotanical remains
