Failure Up Close Jay P. Greene,Michael Q. McShane,2018-01-17 For many reasons failure in education reform is rarely admitted Even though it is incredibly hard work to try and improve the enormous and diverse American education system because there are political consequences of admitting that a particular effort did not live up to its promises and pressure from philanthropic funders to show success unsuccessful efforts are often swept under the rug or papered over with public relations efforts that avoid wrestling with the tough realities of educational improvement This doesn't help anyone As any educator will tell you failure is an essential part of learning Insofar as education reform needs to be a learning movement itself it has to be able to admit where it has failed and learn from it Failure Up Close engages a select group of scholars from across the ideological spectrum to examine particular education reform efforts of recent years that have not succeeded and offer lessons for school and system improvement that can be learned from them Rather than view failure as negative this volume looks at failure as an opportunity to learn and grow In fact the editors endeavored to find authors that would analyze reforms for which they had some fundamental sympathy The goal is not to bash particular efforts or castigate their supporters but rather to help those supporters understand how to do what they do better and ultimately do better for children

Mandate Madness James T. Bennett, 2017-07-05 What do drivers licenses that function as national ID cards nationwide standardized tests for third graders the late unlamented 55 mile per hour speed limit the outlawing of the eighteen year old beer drinker and the disappearing mechanical lever voting machine have in common Each is the product of an unfunded federal mandate a concept that politicians of both parties profess to oppose in theory but which in practice they often find irresistible as a means of forcing state and local governments to do their bidding while paying for the privilege Mandate Madness explores the history debate and political gamesmanship surrounding unfunded federal mandates concentrating on several of the most controversial and colorful of these laws The cases hold lessons for those who would challenge current or future unfunded federal mandates James T Bennett also examines legislative efforts to rein in or repeal unfunded federal mandates Finally he reviews the treatment of unfunded mandates by the federal courts Those who find wisdom in America s traditional federalist political arrangement maintain perhaps with more wishfulness than realism that the unfunded federal mandate has not yet joined death and taxes as an immovable part of the modern political landscape
