Call of the Cats Andrew Bloomfield,2016-10-14 When aspiring screenwriter Andrew Bloomfield moved into a bungalow in Southern California he soon discovered that he shared the property with a large colony of feral cats untamed uninterested in human touch not purring pets in waiting But after a midnight attack by predators that decimated yet another litter of kittens Bloomfield decided to intervene He began to name and nurse feed and house rescue and neuter Drawing on his time living in Asia among spiritual teachers he takes us on the contemplative humorous and poignant journey of saving these cats only to find it was they who saved him by revealing a world of meaning beyond his unrealized Hollywood dreams *Domesticated:*

Evolution in a Man-Made World Richard C. Francis,2015-05-25 Without domestication civilization as we know it would not exist Since that fateful day when the first wolf decided to stay close to human hunters humans and their various animal companions have thrived far beyond nearly all wild species on earth Tamelessness is the key trait in the domestication of cats dogs horses cows and other mammals from rats to reindeer Surprisingly with selection for tameness comes a suite of seemingly unrelated alterations including floppy ears skeletal and coloration changes and sex differences It s a package deal known as the domestication syndrome elements of which are also found in humans Our highly social nature one of the keys to our evolutionary success is due to our own tameness In *Domesticated* Richard C Francis weaves history and anthropology with cutting edge ideas in genomics and evo devo to tell the story of how we domesticated the world and ourselves in the process

In the Light of Evolution National Academy of Sciences,2009-11-30 *Two Centuries of Darwin* is the outgrowth of an Arthur M Sackler Colloquium sponsored by the National Academy of Sciences on January 16 17 2009 In the chapters of this book leading evolutionary biologists and science historians reflect on and commemorate the Darwinian Revolution They canvass modern research approaches and current scientific thought on each of the three main categories of selection natural artificial and sexual that Darwin addressed during his career Although Darwin s legacy is associated primarily with the illumination of natural selection in *The Origin* he also contemplated and wrote extensively about what we now term artificial selection and sexual selection In a concluding section of this book several science historians comment on Darwin s seminal contributions *Two Centuries of Darwin* is the third book of the *In the Light of Evolution* series Each installment in the series explores evolutionary perspectives on a particular biological topic that is scientifically intriguing but also has special relevance to contemporary societal issues or challenges The ILE series aims to interpret phenomena in various areas of biology through the lens of evolution and address some of the most intellectually engaging as well as pragmatically important
