Kiarina Kordela, 2017-10-06 A Kiarina Kordela steps beyond extant commentaries on Marx's theory of commodity fetishism from A Sohn Rethel to L Althusser Balibar Slavoj Žižek and others to show that in capitalism value is the manifestation of the

homology between thought and being while their other aspect power is foreclosed and becomes the object of biopower Using monistic Marxian Lacanian structuralism as an alternative to dominant models from Plato and Kant to phenomenological accounts deconstruction and other contemporary approaches Kordela expertly argues that Marx's theory of commodity fetishism is a reformulation of the Spinozian thesis that thought mind and things bodies or extension are manifestations of one and the same being or substance Kordela's link between Spinoza and Marx shows that being consists of two aspects value and power the former leading to structuralist thought the latter becoming the object of contemporary biopower Epistemology in Spinoza Marx Freud Lacan intervenes between two dominant lines of thought in the reception of Marx today on the one hand an approach that relates Marxian thought to psychoanalysis from a Hegelian dialectical perspective and on the other hand an approach that links Marxism to Spinozian monism at the total exclusion of psychoanalysis This book will interest scholars and researchers who study Marxism post structuralism psychoanalysis critical theory ontology epistemology and theories of representation theoreticians of cultural studies and comparative literature aesthetic theory including the relation of art to economy and politics and biopolitics

**El Dorado** Josie Hertz, High in the emerald mountains of Colombia where mist clings to ancient peaks and pristine lakes reflect the endless sky lies the origin of one of history's most enduring and transformative legends Lake Guatavita a perfectly circular body of water nestled in the Cordillera Oriental at an altitude of over 10 000 feet served as the sacred center for a ritual so magnificent and mysterious that it would capture the imagination of European conquistadors and spawn centuries of exploration conquest and dreams of unimaginable wealth Here in this remote and beautiful setting the Muisca people of pre Columbian Colombia created a ceremony that would become known to the world as El Dorado literally the golden one a ritual that would forever change the course of history in the Americas and beyond The Muisca civilization which flourished in the high plateau of Cundinamarca from approximately 600 CE until the Spanish conquest in the 1530s represented one of the most sophisticated and peaceful societies in pre Columbian South America Unlike their more militaristic neighbors the Muisca developed a complex confederation of chieftains who governed through consensus and diplomacy rather than conquest and force Their society was built around agriculture trade and elaborate religious ceremonies that honored the natural world and the cosmic forces they believed governed human destiny The Muisca were master craftsmen particularly skilled in working gold creating intricate figurines ornaments and ceremonial objects that displayed an artistic sophistication rivaling any civilization of their time

**The Zuni and the American Imagination** Eliza McFeely, 2015-06-23 A bold new study of the Zuni of the first anthropologists who studied them and of the effect of Zuni on America's sense of itself The Zuni society existed for centuries before there was a United States and it still exists in its desert pueblo in what is now New Mexico In the late nineteenth century anthropologists among the first in this new discipline came to Zuni to study it and they believed to salvage what they could of its tangible culture before it was destroyed which they were sure would happen Matilda Stevenson Frank Hamilton Cushing and Stewart Culin were the three most important of these early students of Zuni and although modern anthropologists often disparage and ignore their work sometimes for good sometimes for poor reasons these pioneers gave us an idea of the power and significance of Zuni life that has endured into our time They did not expect the Zuni themselves to endure but they have and the complex relation between the Zuni as they were and are and the Zuni as imagined by these three Easterners is at the heart of Eliza McFeely's important new book Stevenson Cushing and Culin are themselves remarkable subjects not just as anthropology's earliest pioneers but as striking personalities in their own right and McFeely gives ample consideration in her colorful and absorbing study to each of them For different reasons all three found professional and psychological satisfaction in leaving the East for the West in submerging themselves in an alien and little known world and in bringing back to the nation's new museums and exhibit halls literally thousands of Zuni artifacts Their doctrines about social development their notions of salvage anthropology their cultural biases and predispositions are now regarded with considerable skepticism but nonetheless their work imprinted Zuni on the American imagination in ways we have yet to measure It is the great merit of McFeely's fascinating work that she puts their intellectual and personal adventures into a just and measured perspective she enlightens us about America about Zuni and about how we understand each other
