elaborations of the legend Collectively their essays constitute a forceful statement against this false accusation The legend is traced from the murder of William of Norwich in 1144 one of the first reported cases of ritualized murder attributed to Jews through nineteenth century Egyptian reports Spanish examples Catholic periodicals modern English instances and twentieth century American cases The essays deal not only with historical cases and surveys of blood libel in different locales but also with literary renditions of the legend including the ballad Sir Hugh or the Jew's Daughter and Chaucer's The Prioress's Tale These case studies provide a comprehensive view of the complex nature of the blood libel legend The concluding section of the volume includes an analysis of the legend that focuses on Christian misunderstanding of the Jewish feast of Purim and the child abuse component of the legend and that attempts to bring psychoanalytic theory to bear on the content of the blood libel legend The final essay by Alan Dundes takes a distinctly folkloristic approach examining the legend as part of the belief system that Christians developed about Jews This study of the blood libel legend will interest folklorists scholars of
