The History of Cartography, Volume 6 Mark Monmonier, 2015-05-18 For more than thirty years the History of Cartography Project has charted the course for scholarship on cartography, bringing together research from a variety of disciplines on the creation, dissemination, and use of maps. Volume 6, Cartography in the Twentieth Century, continues this tradition with a groundbreaking survey of the century just ended and a new full-color encyclopedic format. The twentieth century is a pivotal period in map history. The transition from paper to digital formats led to previously unimaginable dynamic and interactive maps. Geographic information systems radically altered cartographic institutions and reduced the skill required to create maps. Satellite positioning and mobile communications revolutionized wayfinding. Mapping evolved as an important tool for coping with complexity, organizing knowledge, and influencing public opinion in all parts of the globe and at all levels of society. Volume 6 covers these changes comprehensively while thoroughly demonstrating the far-reaching effects of maps on science, technology, and society, and vice versa. The lavishly produced volume includes more than five hundred articles accompanied by more than a thousand images. Hundreds of expert

well as senior scholars examines the manner in which peoplehood was understood by the Jewish communities of the Second Temple period and by the religious traditions that emerged from those communities and later flourished in Christianity and Rabbinic Judaism The Hebrew and Greek terms for people and nation and the name Israel are closely analyzed especially in forays into wisdom literature Jewish apologetic and the Dead Sea Scrolls and their uses are related to geographical political and theological developments as well as statehood authority and rulership in the Persian world Hasmonean times and Ptolemaic Egypt Especially interesting are the carefully argued and documented suggestions about how Jewish peoplehood expressed itself with regard to charitable behavior pagan deities and marital regulations Those interested in the history of cultural and theological tensions will be intrigued by the studies centered on how the opponents of Jews behaved towards the people of God how Hellenistic Jewish culture located the Jews on the Roman rather than on the Greek side and how early Christian discourse saw the mission among the peoples and interpreted earlier sources accordingly The idea of the Jewish way of life is seen to have influenced the writer of the longer Greek version of Esther and works of fiction are shown to have had important historical data within them Modern social theory also has its say here in a careful consideration of Cognitive theory of ethnicity and the dynamic of ethnic boundary making From Tradition to Commentary Steven D. Fraade, 2012-02-01 This book examines Torah and its interpretation both as a recurring theme in the early rabbinic commentary and as the very practice of the commentary It studies the phenomenon of ancient rabbinic scriptural commentary in relation to the perspectives of literary and historical criticisms and their complex intersection The author discusses extensively the nature of ancient commentary comparing and contrasting it with the antecedents in the pesharim of the Dead Sea Scrolls and the allegorical commentaries of Philo of Alexandria He develops a model for a dynamic understanding of the literary structure and sociohistorical function of early rabbinic commentary and then applies this model to the Sifre to the oldest extant running commentary to Deuteronomy and one of the oldest rabbinic collections of exegesis Fraade examines the commentary's representation of revelation and its reception at Mt Sinai with particular attention to its fractured refiguration and interrelation of Scripture tradition and history He discusses the commentary's discursive empowering of the class of sages in their collective self understanding as Israel's authorized teachers leaders legislators and judges The author also probes the tension between Torah and nature as witnesses to Israel's covenant with God
