From A Biological Point Of View Essays In Evolutionary Philosophy:

From a Biological Point of View Elliott Sober, 1994-09-30 Elliott Sober is one of the leading philosophers of science and is a former winner of the Lakatos Prize the major award in the field This new collection of essays will appeal to a readership that extends well beyond the frontiers of the philosophy of science Sober shows how ideas in evolutionary biology bear in significant ways on traditional problems in philosophy of mind and language epistemology and metaphysics Amongst the topics addressed are psychological egoism solipsism and the interpretation of belief and utterance empiricism Ockham's razor causality essentialism and scientific laws The collection will prove invaluable to a wide range of philosophers primarily those working in the philosophy of science the philosophy of mind and epistemology

Alasdair MacIntyre's Views and Biological Ethics Sherel Jeevan Joseph Mendonsa, 2022-11-29 Some of the most fundamental questions which moral philosophers have been grappling with include What makes us moral beings Is morality a product of culture or nature or both Are ethical norms and principles universal and unchanging or are they relative being rooted in specific socio political and historical contexts Can ethical conclusions be derived from descriptive statements This book addresses these and similar questions through a comparative study between Alasdair MacIntyre's views and biological ethics It discusses how both MacIntyre's views and biological ethics highlight the importance of human biology for human morality Based on this discussion the book proposes that both the rational and the biological including the emotional dimensions of humans have to be considered in order to understand the complex and multi layered phenomenon of human morality As such it will prove to be a valuable resource for undergraduate and postgraduate students of moral philosophy especially those interested in studying the biological approach toward ethics Thomistic Aristotelian ethics and metaethics

Unto Others Elliott Sober, David Sloan Wilson, 1999-10-01 The authors demonstrate that unselfish behavior is in fact an important feature of both biological and human nature Their book provides a panoramic view of altruism throughout the animal kingdom from self sacrificing parasites to the human capacity for selflessness even as it explains the evolutionary sense of such behavior

A Realist Metaphysics of Race Jeremy Pierce, 2014-12-11 In *A Realist Metaphysics of Race* A Context Sensitive Short Term Retentionist Long Term Revisionist Approach Jeremy Pierce defends a social kind view of racial categories On this view the biological features we use to classify people racially do not make races natural kinds Rather races exist because of contingent social practices single out certain groups of people as races give them social importance and allow us to name them as races Pierce also identifies several kinds of context sensitivity as central to how racial categorization works and argues that we need racial categories to identify problems in how our racial constructions are formed including the harmful effects of racial constructions Hence rather than seeking to eliminate such categories Pierce argues that we should also make efforts to change the conditions that generate their problematic elements with an eye toward retaining only the unproblematic aspects *A Realist Metaphysics of Race* contains insights relevant not just to professional philosophers in

metaphysics philosophy of race social philosophy philosophy of language and philosophy of science but also to students and scholars working in sociology biology anthropology ethnic studies and political science **Handbook of**

From Truth to Reality Heather Dyke, 2009-06-02 Questions about truth and questions about reality are intimately connected One can ask whether numbers exist by asking Are there numbers But one can also ask what arguably amounts to the same question by asking Is the sentence There are numbers true Such semantic ascent implies that reality can be investigated by investigating our true sentences This line of thought was dominant in twentieth century philosophy but is now beginning to be called into question In *From Truth to Reality* Heather Dyke brings together some of the foremost metaphysicians to examine approaches to truth reality and the connections between the two This collection features new and previously unpublished material by JC Beall Mark Colyvan Michael Devitt John Heil Frank Jackson Fred Kroon D H Mellor Luca Moretti Alan Musgrave Robert Nola J J C Smart Paul Snowdon and Daniel Stoljar

Modeling Rationality, Morality, and Evolution Peter Danielson, 1998-10-29 This collection focuses on questions that arise when morality is considered from the perspective of recent work on rational choice and evolution Linking questions like Is it rational to be moral to the evolution of cooperation in *The Prisoners Dilemma*

the book brings together new work using models from game theory evolutionary biology and cognitive science as well as from philosophical analysis Among the contributors are leading figures in these fields including David Gauthier Paul M Churchland Brian Skyrms Ronald de Sousa and Elliot Sober

The Biology and Psychology of Moral Agency William Andrew Rottschaefer, 1998 Brings findings and theories in biology and psychology to bear on ethics

Ghosts R. C. Finucane, 1996-06 Throughout history people have reported seeing ghosts But a Victorian ghost is in many respects a very different phenomenon from a ghost in Classical Greece or in medieval Europe Finucane surveys reports of ghosts from ancient Greece the early Christian era the Reformation the Victorian age and through the twentieth century He asks such questions as How have the physical aspects claimed for ghosts varied from age to age What differences are there in the functions and intentions ascribed to ghosts How have the changes in more general beliefs in religion and science in particular influenced the perception of ghosts Drawing on primary sources from all periods and cultures Finucane addresses this topic in its full breadth R C Finucane Rochester MI is chairperson of the Department of History at Oakland University highly recommended Magonia UK a useful book for those readers interested in the history of the supernatural Extrapolation

Concepts and the Appeal to Cognitive Science Samuel D. Taylor, 2021-03-08 This book evaluates whether or not we can decide on the best theory of concepts by appealing to the explanatory results of cognitive science It undertakes an in depth analysis of different theories of concepts and of the

explanations formulated in cognitive science As a result two reasons are provided for thinking that an appeal to cognitive science cannot help to decide on the best theory of concepts *Primate Behavioral Ecology* Karen B. Strier, 2016-08-25 This comprehensive introductory text integrates evolutionary ecological and demographic perspectives with new results from field studies and contemporary noninvasive molecular and hormonal techniques to understand how different primates behave and the significance of these insights for primate conservation Each chapter is organized around the major research themes in the field with Strier emphasizing the interplay between theory observations and conservation issues Examples are drawn from the classic primate field studies as well as more recent studies on previously neglected species illustrating the vast behavioral variation that exists across the primate order *Primate Behavioral Ecology* 5th Edition also examines how anthropogenic activities are negatively impacting primate populations including a thorough analysis of behavioural plasticity and its implications This fully updated new edition incorporates exciting new discoveries and the most up to date approaches in the field to provide an invaluable overview of the field of primate behavioral ecology and its applications to primate conservation It is considered to be a must read for all students interested in primates **Debating Design** William A. Dembski, Michael Ruse, 2004-07-12 In this book first published in 2004 William Dembski Michael Ruse and other prominent philosophers provide a comprehensive balanced overview of the debate concerning biological origins a controversial dialectic since Darwin published *The Origin of Species* in 1859 Invariably the source of controversy has been design Is the appearance of design in organisms as exhibited in their functional complexity the result of purely natural forces acting without prevision or teleology Or does the appearance of design signify genuine prevision and teleology and if so is that design empirically detectable and thus open to scientific inquiry Four main positions have emerged in response to these questions Darwinism self organisation theistic evolution and intelligent design The contributors to this volume define their respective positions in an accessible style inviting readers to draw their own conclusions Two introductory essays furnish a historical overview of the debate Moral Reality and the Empirical Sciences Thomas Pölzler, 2018-05-11 Are there objective moral truths things that are morally right or wrong independently of what anybody thinks about them To answer this question more and more scholars have recently begun to appeal to evidence from scientific disciplines such as psychology neuroscience biology and anthropology This book investigates this novel scientific approach in a comprehensive empirically focused partly clarificatory and partly metatheoretical way It argues for two main theses First it is possible for the empirical sciences to contribute to the moral realism anti realism debate And second most appeals to science that have so far been proposed are insufficiently empirically substantiated The book s main chapters address four prominent science based arguments for or against the existence of objective moral truths the presumptive argument the argument from moral disagreement the sentimentalist argument and the evolutionary debunking argument For each of these arguments Thomas Pölzler first identifies the sense in which its underlying empirical hypothesis would have to be true in order for the argument to work Then he shows that the

available scientific evidence fails to support this hypothesis Finally he also makes suggestions as to how to test the hypothesis more validly in future scientific research Moral Reality and the Empirical Sciences is an important contribution to the moral realism anti realism debate that will appeal both to philosophers and scientists interested in moral psychology and metaethics

Resistance to Evidence Mona Simion, 2024-02-07 We have increasingly sophisticated ways of acquiring and communicating knowledge but efforts to spread this knowledge often encounter resistance to evidence The phenomenon of resistance to evidence while subject to thorough investigation in social psychology is acutely under theorised in the philosophical literature Mona Simion's book is concerned with positive epistemology it argues that we have epistemic obligations to update and form beliefs on available and undefeated evidence In turn our resistance to easily available evidence is unpacked as an instance of epistemic malfunctioning Simion develops a full positive integrated epistemological picture in conjunction with novel accounts of evidence defeat norms of inquiry permissible suspension and disinformation Her book is relevant for anyone with an interest in the nature of evidence and justified belief and in the best ways to avoid the high stakes practical consequences of evidence resistance in policy and practice This title is also available as Open Access on Cambridge Core
