# From Chivalry To Terrorism War And The Changing Nature Of Masculinity:

**From Chivalry to Terrorism** Leo Braudy, 2003 Beginning with the world of the chivalric Middle Ages and ending in this age of global terrorism and limited war Braudy shows how the perceptions and images of masculinity have changed in relation to major wars and advances in war technology Man Up Morna Ramday, 2015-10-05 Much has been written regarding the New Woman in the fin de si cle and the changes women s groups fought so hard to achieve However the social and gender changes demanded by women as the nineteenth century drew to a close necessitated a corresponding change in traditional masculinities Redefinition of the male role was not easily negotiated in an era of rampant patriarchy and Victorian supremacy the distinct boundaries between male and female social space made this increasingly problematic for both genders Some Victorian men who had seen the public sphere as exclusively theirs felt both their masculinity and male privilege threatened and were confused by women's challenges and their attempted encroachment into what had previously been perceived as solely male domains While many female authors explored possibilities for the New Woman figure as the fin de si cle approached male authors began to consider how masculinities might respond to changing gender dynamics Authors such as Sir Arthur Conan Doyle and Bram Stoker amongst others addressed ways in which their male characters could negotiate a guandary of masculinities under threat by alterations to conventional gender spheres while remaining manly in situations which required a rethinking of many of their basic tenets during this time of flux This book examines the opinions of women within both the dominant and reverse discourses and parallels them with ideas surrounding changes in masculinities that began to emerge in male authored texts As such it details an often vociferous negotiation of volatile issues which led to a major upheaval of gender roles in the approach to a new century that demanded changes which were difficult to achieve The Nature of Masculinity Steve Garlick, 2016-10-11 Social theorists have argued that as the complexity of our ecosystems becomes more apparent the line between nature and culture human and nonhuman and technology and bodies becomes less distinct Yet contemporary masculinity studies has generally failed to incorporate this new way of thinking In this penetrating analysis of the relationship between gender and nature Steve Garlick proposes that masculinity is best understood as a technology that shapes both our engagement with the natural world and how we define freedom Extending the work of the Frankfurt School and Heidegger's critique of modern technology The Nature of Masculinity draws on case studies and new materialist theories to argue that the essence of technology is not in mechanical devices but in a particular relationship to natural forces Within this critical framework masculinity is a technology of embodiment and freedom does not lie in the domination of nature but rather in fostering a new relation to it Global Politics Jenny Edkins, Maja Zehfuss, 2019-01-18 The third edition of Global Politics A New Introduction continues to provide a completely original way of teaching and learning about world politics. The book engages directly with the issues in global politics that students are most interested in helping them to understand the key questions and theories and also to develop a critical and inquiring

perspective Completely revised and updated throughout the third edition offers up to date examples engaging with the latest developments in global politics including the Syrian war and the refugee crisis fossil fuel divestment racism and Black Lives Matter citizen journalism populism and drone warfare Global Politics examines the most significant issues in global politics from war peacebuilding terrorism security violence nationalism and authority to poverty development postcolonialism human rights gender inequality ethnicity and what we can do to change the world offers chapters written to a common structure which is ideal for teaching and learning and features a key question an illustrative example general responses and broader issues integrates theory and practice throughout the text by presenting theoretical ideas and concepts in conjunction with a global range of historical and contemporary case studies Drawing on theoretical perspectives from a broad range of disciplines including international relations political theory postcolonial studies sociology geography peace studies and development this innovative textbook is essential reading for all students of global politics and international relations

Through Our Eyes Gail Garfield, 2010-03-11 How have African American men interpreted and what meaning have they given to social conditions that position them as the primary perpetrators of violence How has this shaped the ways they see themselves and engaged the world Through Our Eyes provides a view of black men s experiences that challenges scholars policy makers practitioners advocates and students to grapple with the reality of race gender and violence in America This multi level analysis explores the chronological life histories of eight black men from the aftermath of World War II through the Cold War and into today Gail Garfield identifies the locations impact and implications of the physical personal and social violence that enters the lives of African American men She addresses questions critical to understanding how race gender and violence are insinuated into black men s everyday lives and how experiences are constructed reconstructed and interpreted By appreciating the significance of how African American men live through what it means to be black and male in America this book envisions the complicated dynamics that devalue their lives those of their family and society Space: Critical Geographies of Drugs and Alcohol Christopher M. Moreno, Robert Wilton, 2014-03-05 The consumption of drugs and alcohol and the pleasures and problems arising from this consumption can be understood as embedded and constitutive elements of social family and recreational life At the same time they are key sites of intervention for a broad array of state and non state actors focused on regulation treatment and recovery This edited volume showcases current research on the complex social and cultural geographies of drugs and alcohol Taking an avowedly critical approach the authors draw from a variety of theoretical traditions to explore the socially and spatially embedded nature of alcohol and drug consumption regulation and treatment and the ways in which these give rise to particular lived experiences while foreclosing on others Together the chapters question taken for granted assumptions about the nature of and motivations for drug and alcohol use and pay direct attention to both the intended and unintended consequences of regulation and treatment initiatives Despite and in part because of this critical stance chapters hold immediate implications for drug and alcohol policy and public health interventions This book was originally published as a special issue of Social and Cultural Geography

Bell, 2014-06-03 A mesmerizing account that illuminates not just the Napoleonic wars but all of modern history It reads like a novel Lynn Hunt Eugen Weber Professor of modern European history UCLA The twentieth century is usually seen as the century of total war But as the historian David A Bell argues in this landmark work the phenomenon actually began much earlier in the era of muskets cannons and sailing ships in the age of Napoleon In a sweeping evocative narrative Bell takes us from campaigns of extermination in the blood soaked fields of western France to savage street fighting in ruined Spanish cities to central European battlefields where tens of thousands died in a single day Between 1792 and 1815 Europe plunged into an abyss of destruction It was during this time Bell argues that our modern attitudes toward war were born Ever since the dream of perpetual peace and the nightmare of total war have been bound tightly together in the Western world right down to the present day in which the hopes for an end to history after the cold war guickly gave way to renewed fears of full scale slaughter With a historian s keen insight and a journalist s flair for detail Bell exposes the surprising parallels between Napoleon's day and our own including the way that ambitious wars of liberation such as the one in Irag can degenerate into a gruesome guerrilla conflict The result is a book that is as timely and important as it is unforgettable Thoughtful and original Bell has mapped what is a virtually new field of inquiry the culture of war Steven L Kaplan Goldwin Smith Professor of Gender, Peace and Security in Africa Cheryl Hendricks, Romi Sigsworth, 2018-02-06 European history Cornell University There is often a moment in time that acts as a rallying point around a particular issue 2015 was one of those moments for women peace and security as numerous landmark anniversaries were celebrated in the field Africa has in many ways been the global laboratory for the gender peace and security agenda not only because of the number of conflicts occurring on the continent but also because African regional organisations governments and civil society organisations have been at the forefront of striving for gender equality and implementing United Nations Security Council Resolution 1325 This book explores gender peace and security in Africa from multiple angles including the conceptual and implementation challenges and shifts around women peace and security in Africa over the last 15 years women s role as combatants in national

liberation forces in South Africa the dynamics of gender in the military through the lens of Kenyan women combatants food security through a feminist lens and a series of case studies on the nexus between gender and security in Zimbabwe Nigeria Madagascar the Democratic Republic of Congo Kenya and Somalia This book was previously published as a special issue of the African Security Review Race and Gender in Modern Western Warfare David Ulbrich, Bobby A. Wintermute, 2018-12-03 This book fills a gap in the historiographical and theoretical fields of race gender and war In brief Race and Gender in Modern Western Warfare RGMWW offers an introduction into how cultural constructions of identity are transformed by war and how they in turn influence the nature of military institutions and conflicts Focusing on the modern West this project begins by introducing the contours of race and gender theories as they have evolved and how they are employed by historians anthropologists sociologists and other scholars. The project then mixes chronological narrative with analysis and historiography as it takes the reader through a series of case studies ranging from the early nineteenth century to the Global War of Terror The purpose throughout is not merely to create a list of so called great moments in race and gender but to create a meta landscape in which readers can learn to identify for themselves the disjunctures flaws and critical synergies in the traditional memory and history of a largely monochrome and male exclusive military experience The final chapter considers the current challenges that Western societies particularly the United States face in imposing social diversity and tolerance on statist military structures in a climates of sometimes vitriolic public debate RGMWW represents our effort to blend race gender and military war to problematize these intersections and then provide some answers to those Weighing Lives in War Jens David Ohlin, Larry May, Claire Finkelstein, 2017-08-04 The chief means to limit problems and calculate the costs of war are the philosophical and legal concepts of proportionality and necessity Both categories are meant to restrain the most horrific potential of war The volume explores the moral and legal issues in the modern law of war in three major categories In so doing the contributions will look for new and innovative approaches to understanding the process of weighing lives implicit in all theories of jus in bello who counts in war understanding proportionality and weighing lives in asymmetric conflicts These questions arise on multiple levels and require interdisciplinary consideration of both Yearbook of International Humanitarian Law Volume 17, 2014 T.D.
